Rating of Impairment Severity Report

1. Restriction of Activities of Daily Living (ADLs)

- Activities of daily living include adaptive behaviors such as cleaning, shopping, cooking, using public transportation, paying bills, maintaining a residence, attending to grooming and hygiene, using a phone book, or using a post office, etc.
- Functioning in this area will be evaluated by determining the extent to which these tasks can be performed independently, appropriately, and effectively.
- A marked limitation is not the number of activities restricted, but the nature and overall degree of interference with function.

Rate the degree of severity: None Mild Moderate Marked Extreme

Please cite evidence for this rating:

2. Social Functioning (SF)

- Social functioning refers to the capacity to interact appropriately, independently, and effectively with other individuals on a sustained basis.
- Impaired social functioning may be demonstrated by a history of altercations, evictions, firings, fear of strangers, avoidance of interpersonal relationships, social isolation, etc.
- Social functioning in work situations may involve interacting with the public, responding appropriately to persons in authority, or cooperating with coworkers.
- A marked limitation in social functioning is not the total number of areas impaired, but the nature and overall degree of interference with function.

Rate the degree of severity: None Mild Moderate Marked Extreme

Please cite evidence for this rating:

3. Concentration, Persistence, or Pace (CPP)

- Concentration, persistence, or pace refer to the ability to sustain focused attention and concentration sufficiently long to permit the timely appropriate completion of tasks commonly found in work and other settings.
- Major impairment in this area can often be assessed through direct psychiatric and/or psychological testing, although test results should be supplemented with other relevant information when available.
- A marked limitation in concentration, persistence or pace is not the total number of areas impaired, but the nature and overall degree of interference with function.

Rate the degree of severity: None Mild Moderate Marked Extreme
