

# Aposun COVID-19 me Tumun: Weweiti Aninisin me pwan ngawen

## Aninisin apposun mRNA

- **Fakkun tekia ukukun ren pinepinen** ngenin COVID-19 me pwan me pwan tonong non pioing seni COVID-19.
- **Chomongen ra appos epwe kan toto ngeni akisanon feinfetanen ewe virus**, iwe ina epwene tumun ngeni ewe foritan me pwan feinfetanen minafon COVID-19 variants.
- **Pinei “taman COVID (long COVID).”**
- **Pinei semwenin COVID-19**, ina epwene kan forata semwenin pwonon ewe foun ngasengas (myocarditis), semwenin non mokureom (neurological problems), kisinon pechakunen ekkewe lungs (diminished lung function) me pwan fakkun katanon ewe foun ngasangas.

## Ngawen Apposun mRNA

- **Fakkun kisikis** ew attun an epwene forata myocarditis — ew pwonon fituken ewe foun ngasangas.
- Ngawen a fakkun tekia non mwan ier 16 tori 30.

## Aruwoben dose ren apposun mRNA a kadowow vs. myocarditis cases

**133 Million**  
aruwoben doses  
ren apposun mRNA a  
kan kadowow

Ukukun chok  
636 cases ren  
myocarditis repotinong  
seni 133 million  
aruwoben doses

## Mi fakkun kisikis

pwe emon epwene forata myocarditis murin an a kan appos ren ewe apposun mRNA, nge a kan fis fan chomong murin ewe aruwoben appos ren appos kena mi ruwow apposur.

Kopwe kan kapas ngeni noum we chon awora tumunun safei ika pwe ka kan mefi ekkoch ekkei napenapen mi etto murin me non unungat tori fisu ran murin eom we appos:

- **Metekin fan mwerum ika pressure**
- **Mwochomwochen ngasangas**

**OHA a nuku ekkewe kaeon seni ewe CDC me pwan pesei meinisin aramasen non Oregon pwe repwe angei apposur.**
