

Reopening Guidance

Sector: Retail

Specific Guidance for Retail Stores:

Retail stores are required to:

- Review and implement [General Guidance for Employers](#).
- Limit the number of customers in the retail store and focus on maintaining at least six (6) feet of distance between people and employees in the store. Store management should determine maximum occupancy to maintain at least six (6) feet of physical distancing, considering areas of the store prone to crowding (like aisles) and limit admittance accordingly.
- Post [clear signs](#) (available at healthoregon.org/coronavirus) listing COVID-19 symptoms, asking employees and customers with symptoms to stay home, and listing who to contact if they need assistance.
- Use signs to encourage physical distancing.
- Frequently clean and sanitize work areas, high-traffic areas, and commonly touched surfaces in both customer/public and employee areas of store. Wipe down changing room doorknobs, walls and seating between each customer use.
- Review and implement [Mask and Face Covering Guidance for Business, Transit and the Public](#).

To the extent possible, retail stores should, but are not required to:

- Consider placing clear plastic or glass barriers in front of cashiers or customer service counters, or in other places where maintaining six (6) feet of physical distance between employees and customers is more difficult.
- Encourage one-way flow with marked entrances and exits, but do not block egress for fire exits. Use signs to direct one-way flow of traffic.
- Use signs and tape on the floor to maintain physical distancing while waiting for cashiers.
- Prohibit customers from trying on items that are worn on the face (cloth masks, scarves, headbands, eyewear).
- Decide whether to re-open fitting rooms. If fitting rooms are re-opened, customers should wash hands or use hand sanitizer before and after trying on clothes. Retailers should provide hand sanitizer or hand washing stations near fitting rooms. Note: There are no scientific data to indicate that clothing items are a major means of spread of the coronavirus. Any risk from this exposure is likely to be very low. Items that have been in

a fitting room can be set aside for a day or longer if the retailer is concerned about perceived risks from clothing that has been tried on by customers.

- When processing returns, employees should wash hands or use hand sanitizer before and after handling items. Retailer may set items aside for a day or longer if concerned about perceived risks of exposure.
- Consider offering alternative order ahead and pick up options, such as curbside pickup as appropriate and applicable.
