Effective Date: May 20, 2021

Sector Guidance — Outdoor Recreation and Outdoor Fitness Establishments

Authority: Executive Order No. 20-66, ORS 433.441, ORS 433.443, ORS 431A.010

Applicability: This guidance applies to:

- outdoor recreation and outdoor fitness establishments; and
- the general public, including leagues, trainers, coaches, officials, players, K-12 and spectators, while participating in or using outdoor recreation and outdoor fitness establishments.
- public outdoor areas, as applicable

Note: The Interim Guidance for Fully Vaccinated Individuals applies to this Sector Guidance. Outdoor Recreation and Outdoor Fitness Establishment operators may permit fully vaccinated individuals to enter without masks or face coverings in accordance with the Interim Guidance for Fully Vaccinated Individuals.

Note: The Statewide Masks, Face Covering, Face Shields Guidance was revised on May 18, 2021, loosening some mask requirements. Outdoor Recreation and Outdoor Fitness Establishment operators are not required to comply with mask, face covering, or face shield restrictions in this Sector Guidance to the extent they are more restrictive than the requirements in the revised Statewide Masks, Face Covering, Face Shields Guidance. For example, if this Sector Guidance refers to a requirement to wear a mask outdoors, the requirement has been superseded by the Statewide Masks, Face Covering, Face Shields Guidance and is no longer effective.

Enforcement: To the extent this guidance requires compliance with certain provisions, it is enforceable as specified in Executive Order 20-66, paragraph 10.

Definitions: For purposes of this guidance, the following definitions apply:

- “Adult and family camps” means camp programming with adults and/or families staying overnight at accommodations on site. An adult camp or family camp may or may not be licensed under ORS Chapter 446.
- “Clean” or “Cleaning” means the use of soap or detergents and water on surfaces to reduce or remove germs from surfaces.
- “Cohort” means a stable group of camp or retreat participants that stays together consistently, with minimal interaction with other groups.
“COVID-19 symptoms” means any or all of the following:

- Primary symptoms: cough, fever (temperature of 100.4°F or higher) or chills, shortness of breath, difficulty breathing and new loss of taste or smell
- Other common symptoms: muscle pain, headache, sore throat, diarrhea, nausea, vomiting, new nasal congestion, and runny nose.

“Disinfect” or “Disinfecting” means the use of disinfectants following cleaning, to kill germs that may remain on surfaces after cleaning.

“Full-contact sports” means sports that involve a requirement or substantial likelihood of routine, sustained close proximity or physical contact between participants, and includes but is not limited to football, rugby, wrestling, cheerleading, basketball, hockey, dance, water polo, men’s lacrosse, unless the sport is played by rules that eliminate the requirement or substantial likelihood of routine, sustained close proximity or physical contact between participants.

“General-use pools” means large pool facilities including but not limited to municipal swimming pools and community center pools.

“Limited-use pools” means pools that are operated in connection with a companion facility, such as an apartment complex, hotel/motel, private club, association or organizational camp where the pool is limited to residents, patrons or members.

“Minimal- and medium-contact sports” include but are not limited to softball, baseball, soccer, volleyball, women’s lacrosse, and flag football.

“Non-contact sports” means sports where participants have no close contact with any other individual while participating in the sport. Non-contact sports include but are not limited to tennis, swimming, cross-country, track and field, sideline/no-contact cheer and dance.

“Outdoor” means any open-air space including any space which may have a temporary or fixed cover (e.g. awning or roof) and at least fifty percent of the square footage of its sides open for airflow such that open sides are not adjacent to each other.

“Outdoor recreation and outdoor fitness establishments” means outdoor locations where outdoor recreation, agritourism, outdoor K-12 sports and fitness activities occur including but not limited to outdoor gyms, outdoor fitness organizations, outdoor recreational sports, outdoor pools, outdoor K-12 sports, outdoor personal training and outdoor dance.

“Public outdoor areas” means outside areas open to the public, such as but not limited to local or state parks, campgrounds, hiking and biking trails, golf courses, ski areas and outdoor skate parks, where outside activities occur such as but not limited to hiking, backpacking, bird watching, spelunking, mountain biking, rock climbing, snowshoeing and ice-climbing.

As general guidance, smaller groups are safer than larger; outdoor locations are safer than indoor locations; sports that can ensure distance of six (6) feet or more are safer than those that require closer contact; shorter-duration activities are safer than longer; and activities that do not involve singing, playing wind instruments, cheering/shouting, or breathing hard are safer than those that do.

**K-12 school sports**
Participation in physical activity is vital to the health and well-being of young people. This guidance is intended to provide opportunities for physical activity while reducing risk of transmission of COVID-19. Guidelines for K-12 School Sports are now based on a county’s COVID-19 risk level (lower, moderate, high, extreme). Guidelines for K-12 School Sports are not dependent on school health metrics from the Ready Schools, Safe Learners guidance. Refer to ODE guidance for reopening to in-person instruction for additional information on school operations. K-12 sports may resume in accordance to the guidance outlined in this document. Spectators of K-12 outdoor sports events must comply with the requirements listed under the ‘Distancing and Occupancy’ section in this guidance.

Additional requirements for extreme- and high-risk Counties:

- Outdoor K-12 full-contact sports, including full contact practice and competition, may take place in counties that are in extreme or high risk, as long as the following is met:
  - K-12 public school districts or governing bodies of private schools may opt-in to practice and compete in outdoor K-12 full-contact sports only if the school is offering Comprehensive Distance Learning with Limited In-Person Instruction (LIPI) or Hybrid or On-Site Instructional Models as described in the Ready Schools, Safe Learners guidance. Districts and private school governing bodies are required to submit a plan for practice and competition for outdoor K-12 full-contact sports that includes an assurance and commitment that all participants will be required to quarantine if exposed to COVID 19 or isolate if they contract COVID-19. This plan will be submitted to ODE and posted on the ODE website.
  - Districts and private school governing bodies opting-in to outdoor K-12 full-contact sports in extreme or high-risk counties, must complete an Outdoor Contact Sports Opt-In Form (found on ODE’s website) and include the following:
    - Offer, at a minimum, Comprehensive Distance Learning with Limited In-Person Instruction (LIPI), with the goal of implementing Hybrid or full On-Site Instructional Models for students before the end of the 2020-21 school year.
    - Comply with the Oregon School Testing Plan.
    - For extreme risk counties, limit sports field capacity for coaches, officials and players to 120 people maximum.
    - For high risk counties, follow the maximum capacity limits for outdoor recreation and fitness based on the designated risk level for the county where the outdoor K-12 full contact sport event is located.
    - Offer on-site responsive testing for symptomatic individuals and for those with known exposures to individuals with COVID-19. This applies to athletes, support staff and volunteers.
    - Collect contact information for contact tracing (as stated below in Contact Tracing section of this guidance).
    - Collect a waiver from each participant or their parent/guardian that acknowledges the health and safety risks of COVID-19 when participating in outdoor full contact sports.

Operations:
Outdoor recreation and outdoor fitness establishments, and operators of public outdoor areas are required to:

- Review and implement Statewide Mask, Face Covering, Face Shield Guidance.
- Ensure all individuals are complying with Statewide Mask, Face Covering, Face Shield Guidance.
- Ensure that any outside spaces created or used for services or operations meet the definition for “outdoor”. If the space does not meet the definition of outdoor, then the services or operations will be considered indoor and therefore must comply with the requirements and guidance for indoor operations.
- Ensure all facilities and equipment are safe to operate and are in good condition after any extended closure in accordance with applicable maintenance and operations manuals and standard operating procedures.
- Keep saunas and steam rooms closed.
- Keep drop-in childcare closed.
- Refer to and apply the Statewide Guidance for Youth Programs for any children and youth programs.
- Post clear signs listing COVID-19 symptoms, asking individuals with symptoms to stay home, and listing who to contact if they need assistance.
- Post clear signs about the mask, face covering, or face shield requirements.
- Use signs to encourage physical distancing throughout facility, including but not limited to reception areas, locker rooms, and near shared equipment areas.
- Establish one-way traffic flow, where possible, for equipment circuits, tracks, etc. Use signs to direct one-way flow of traffic.
- Provide handwashing stations or hand sanitizer (60-95% alcohol content) throughout the facility for by individuals.
- Refer to Eating and Drinking Establishments Guidance for information about food handling and distribution as applicable.
- Communicate all policies and facilities information to individuals, as applicable, prior to resuming outdoor recreation and reopening outdoor fitness establishments.
- Review and implement General Guidance for Employers and Organizations.

Additionally, for extreme- and high-risk counties, outdoor recreation and outdoor fitness establishments that organize practice and competition for adult, youth or club outdoor full-contact sports are required to:

- Offer on-site responsive testing for symptomatic individuals and close contacts.
- Collect contact information for contact tracing (as stated below in the Contact Tracing section of this guidance).
- Collect a signed acknowledgement of risk from each participant or their parent/guardian that includes at least the following acknowledgments:
- Participating in outdoor full contact sports increases the likelihood of transmission of COVID-19.
- Participants will quarantine if exposed to COVID-19 or isolate if they contract COVID-19.

To the extent possible, outdoor recreation and outdoor fitness establishments, and operators of public outdoor areas should, but are not required to:

- Consider having outdoor recreation or outdoor fitness establishment times by appointment to limit number of people in or at the facility. Encourage use during non-peak times as determined and publicized by facility management.
- Consider offering virtual fitness classes, especially for persons at higher risk for severe COVID-19 complications such as people over 60 or with underlying medical conditions.
- Strongly encourage individuals to bring their own filled water bottles and hygiene supplies (including hand sanitizer), as well as to take their trash with them when they leave.
- Permit activities consistent with emergency response activities, including training for emergency personnel, even in a county where, based on the designated risk level, the activity would not be permitted at a particular location. If such activities do take place, OHA requirements and guidance still apply.

If operating an outdoor pool, outdoor recreation and outdoor fitness establishments are required to:

- Comply with OAR 333, Division 60.
- Require staff (including lifeguards) to wear a mask, face covering or face shield when NOT in the water.
- Swim instructors are required to wear masks or face coverings when not in the water.
- For outdoor spa pools, limit the use of the pool to one household unit at a time. Operators may consider scheduling reservations in 15-minute increments.

Distancing and occupancy:

Outdoor recreation and outdoor fitness establishments, and operators of public outdoor areas are required to:

- With the exception of public outdoor areas, limit maximum capacity based on the designated level of risk for the county in which the outdoor recreation or outdoor fitness establishment is located.
  - Capacity limits do not apply to public outdoor areas.
- Ensure that physical distancing of at least six (6) feet between individuals is maintained at all times, including at outdoor playgrounds, splash pads and in and around restrooms.

---

1 The Oregon Administrative Rules that regulate pools in Oregon have different requirements for each type of pool. For example, most limited use pools do not require a lifeguard. If your facility is not required to have a lifeguard, you may disregard that part of the guidance.
• For outdoor sports events, spectators must comply with the capacity limits for Outdoor Entertainment Establishments.
  ▪ Spectators must be in a designated area with separate entrances, exits and restrooms from the sporting event participants, that is at least six (6) feet from the sports activities. Capacity limits for the designated area is separate from the capacity limits for the outdoor recreation and fitness area. Capacity limits must be based on the designated spectator area only and not on the entire outdoor recreation and fitness area.
  ▪ For outdoor sports events, a physical distancing monitor must be assigned to ensure compliance with the maximum capacity limits for spectators.

• As applicable, limit exercise equipment stations to those located at least six (6) feet apart. If equipment cannot be moved to facilitate physical distancing, it must be blocked from being used.

• As applicable, space out player equipment to prevent players from coming into direct contact with one another.

• For one-to-one personal training, maintain six (6) feet of physical distance between trainer and client. Trainer and client should thoroughly wash hands with soap and warm water or use hand sanitizer (60-95% alcohol content) immediately before and after appointment.

• Inform participants, visitors and customers that members of the same party can participate in activities together and do not have to stay six (6) feet apart.

• Assign a physical distancing monitor to ensure compliance with all distancing requirements, including at entrances, exits, restrooms, ski lifts and any other area where people may gather.

• Develop a plan to limit the number of individuals admitted into outdoor recreation and fitness establishments so that six (6) feet of physical distancing can be maintained. Operators may consider requiring reservations to limit the number of individuals in the pool area.

• Arrange or close common areas such as picnic tables not in shelters/structures, day-use shelters, and buildings open to the public so there is at least six (6) feet of physical distance between individuals (chairs, benches, tables).

• Prohibit parties from congregating in parking lots for periods longer than reasonable to retrieve/return gear and enter/exit vehicles.

• When multiple outdoor recreation and fitness events occur at the same outdoor sports complex at the same time, outdoor recreation and fitness establishment operators are required to:
  ▪ Ensure staff, participants and spectators for outdoor recreation do not share space, including but not limited to restrooms, hallways, concession stands.
  ▪ Frequently clean commonly touched surfaces, such as door handles, between subsequent outdoor recreation games.
  ▪ Ensure that frequently-touched surfaces in high-traffic areas such as entrances, exits, check-in tables, restrooms and concession areas, are frequently cleaned between subsequent outdoor recreation games.
If staff, participants and spectators at the same outdoor recreation games share a restroom, leave entrance/exit doors open, if possible, and ensure that commonly touched surfaces such as stall door handles and faucets are regularly cleaned.

Additionally, for extreme- and high-risk counties, outdoor recreation and outdoor fitness establishments that organize practice and competition for adult, youth or club outdoor full-contact sports are required to:

- Follow the capacity limits for outdoor full-contact sports based on the designated risk level for where the sport is being played.

To the extent possible, outdoor recreation and outdoor fitness establishments, and operators of public outdoor areas should, but are not required to:

- Stagger arrival and departure times for individuals to minimize congregating at entrances, exits and restrooms to follow required physical distancing requirements.
- Consider closing alternating parking spots to facilitate at least six (6) feet of physical distance between parties.
- Consider opening loop trails in a one-way direction to minimize close contact between hikers. Designate one-way walking routes to attractions if feasible.
- Encourage the public to visit parks and recreation areas close to home, avoid overnight trips and minimize travel outside their immediate area for recreation.
- Encourage one-way traffic flow with marked entrances and exits and use signs to direct one-way flow of traffic.
- Consider placing clear plastic or glass barriers in front of reception counters, or in other places where maintaining six (6) feet of physical distance between employees and clients is more difficult.
- Assign designated areas for individuals, when not participating, to ensure physical distancing is maintained.

If operating an outdoor pool, outdoor recreation and outdoor fitness establishments are required to:

- Alter pool deck layouts to ensure individuals can keep six (6) feet of physical distance.
- If using the pool for lap swim, design and implement a plan so that individuals enter and exit the pool on opposite ends and maintain six (6) feet of physical distance between one another. Prohibit the gathering of people within the facility, including at the ends of lanes.
- Designate a waiting area for individuals that allows for six (6) feet physical distancing.

For swim lessons, swim instructors are allowed to be closer than six feet from their students, but close contact should be limited as much as possible. If operating a ski lift or T-bar, operators of public outdoor areas are required to:

- Ensure that people waiting in line maintain at least six (6) feet of physical distance from each other. Members of the same household or the same party are not required to maintain physical distance.
- Ensure that only members of the same household or same party ride on the ski lift together, unless a physical distance of at least six (6) feet can be maintained between parties at all times while on the ski lift.
**Locker rooms:**

If the outdoor recreation and outdoor fitness establishment operators allow locker room use, they are required to:

- Prohibit the use of indoor recreation and indoor fitness establishments for any other purpose than locker room use.
  - In extreme risk counties, all saunas, steam rooms, hot tubs, therapy pools and any other licensed pool is not allowed to operate inside of locker rooms.
- Develop and implement a plan to keep at least six (6) feet of physical distance between people.
- Ensure that the locker room does not exceed maximum occupancy. Use the total square footage of the locker room to determine the maximum occupancy of the locker room based on a minimum of 35 square feet per person.
- Assign a physical distancing monitor to ensure individuals follow all physical distancing requirements, including at entrances, exits, restrooms and any other area where people may gather.

**Cleaning and Disinfection**

Outdoor recreation and outdoor fitness establishments, and operators of public outdoor recreation areas are required to:

- Thoroughly clean all areas of fitness-related organization with products containing soap or detergents prior to reopening after extended closure.
- As applicable, require individuals to thoroughly clean all equipment (e.g., balls, weights, machines, etc.) immediately before and after each use.
- Thoroughly clean restroom facilities daily and ensure adequate sanitary supplies (e.g., soap, toilet paper, 60-95% alcohol content hand sanitizer) throughout the day. Outdoor recreation and outdoor fitness establishment operators may consider using a “one-in-one-out” policy, where only one individual is permitted within the restroom at one time.
  - Operators that are unable to regularly clean restroom facilities must post a sign stating that the restroom is not regularly cleaned, and that sanitary supplies are not regularly replenished.
- Encourage handwashing in and around outdoor recreation and outdoor fitness establishments and provide handwashing stations and/or hand sanitizer in and around the premises, including near outdoor gym equipment and entrances and exits to the establishment.
- Disinfecting surfaces is recommended if certain conditions apply, such as the space being occupied by an individual that has been sick or tested positive for COVID-19. Use disinfectants that are included on the Environmental Protection Agency (EPA) approved list for the SARS-CoV-2 virus that causes COVID-19.
  - Operators may consider following the disinfection practices recommended by the Pediatric Environmental Health Safety Units.

Operators of public outdoor recreation areas should, but are not required to:
• Encourage individuals to bring their own hand sanitizer for personal use and to wipe down surfaces before and after using them.

If operating an outdoor pool, outdoor recreation and outdoor fitness establishments are required to:

• Thoroughly clean all areas of the outdoor pool prior to reopening after extended closure. Specifically:
  ▪ Prevent Legionella: If a facility has been closed for a prolonged period:
    ☑ Flush your water system, both hot and cold water. The purpose of flushing is to replace all water inside building piping with fresh water.
    ☑ Flush until the hot water reaches its maximum temperature.
    ☑ Care should be taken to minimize splashing and aerosol generation during flushing.
    ☑ Other water-using devices, such as ice machines, may require additional cleaning steps in addition to flushing, such as discarding old ice. Follow water-using device manufacturers’ instructions.
  ▪ Have maintenance staff or a pool maintenance company regularly check the pool recirculation equipment for proper operation and pool sanitizer levels prior to the opening of the pool.
  ▪ Prohibit lifeguards from cleaning and sanitizing while on duty.

To the extent possible, if operating an outdoor pool, outdoor recreation and outdoor fitness establishments should, but are not required to:

• Strongly encourage clients to wash hands with soap and water for 20 seconds and/or use hand sanitizer (60-95% alcohol content) immediately before and after pool use.
• Flush water pipes weekly while the outdoor pool is vacant and prior to resuming normal pool use. Stagnant water in pipes can create conditions that favor the growth and spread of Legionella and other harmful bacteria (see Guidance for Reopening Building Water Systems after Prolonged Shutdown).

Contact tracing:

For extreme- and high-risk counties, outdoor recreation and outdoor fitness establishments that organize practice and competition for adult, youth or club outdoor full-contact sports are required to:

• Record participant, visitor and customer contact information, date and time of outdoor recreation or outdoor fitness establishment use. If there is a positive COVID-19 case associated with the outdoor recreation or outdoor fitness establishment, public health officials may need the business to provide this information for a contact tracing investigation. Unless otherwise required, this information may be destroyed after 60 days from the session date.

To the extent possible, outdoor recreation and outdoor fitness establishments should, but are not required to:

• Record participant, visitor and customer contact information, date and time of outdoor recreation or outdoor fitness establishment use. If there is a positive COVID-19 case
associated with the outdoor recreation or outdoor fitness establishment, public health officials may need the business to provide this information for a contact tracing investigation. Unless otherwise required, this information may be destroyed after 60 days from the session date.

- Screen participants, visitors and customers prior to start of the outdoor recreation or outdoor fitness establishment session such as asking:
  - Have you had a new or worsening cough?
  - Have you had a fever?
  - Have you had shortness of breath?
  - Have you been in close contact with anyone with these symptoms or anyone who has been diagnosed with COVID-19 in the past 14 days?

If the participant, visitor or customer responds “yes” to any of the screening questions, ask them to return home and wait to return to the facility until all symptoms, including fever have been resolved for at least 24 hours without medication, or at least 14 days after contact with a person with a cough, fever, or diagnosed with COVID-19.

- Strongly encourage a participant, visitor or customer exhibiting symptoms of illness to immediately leave the facility and not return until at least 24 hours after symptoms have resolved without medication.

- Strongly encourage participants, visitors and customers at higher risk for severe COVID-19 complications (persons over age 65 or with underlying medical conditions) to continue to stay home to reduce their risk of exposure.

**Training and playing:**

Outdoor recreation and fitness establishments are required to:

- Ensure that there is only the minimal or medium contact among participants needed to play the game.

- Prohibit handshakes, high fives, fist/elbow bumps, chest bumps and group celebrations.

To the extent possible, outdoor recreation and fitness establishments where sports are played should, but are not required to:

- Encourage players to use only their own equipment when feasible. Avoid or minimize equipment sharing, when feasible.

- Some critical equipment may not be available to each player. When it is necessary to share critical or limited equipment, all surfaces of each piece of shared equipment must be cleaned or disinfected frequently, as appropriate for the sport (e.g., between players, sets, periods, or games). Use disinfectants that are included on the [Environmental Protection Agency (EPA) approved list](https://www.epa.gov) for the SARS-CoV-2 virus that causes COVID-19.
  - Clean all equipment that directly contacts the head, face and hands with extra attention and detail.
  - Operators may consider following the disinfection practices recommended by the [Pediatric Environmental Health Safety Units](https://www.cdc.gov).
• Allow only trainers, coaches and players to attend practices to ensure physical distancing and prevent people from gathering.

• Schedule enough time between practices and games so all people from a previous practice can leave the premises before the next group enters. This minimizes gathering at entrances, exits and restrooms while providing sufficient time to clean the facilities/equipment.

• Require individuals to enter the premises through a designated entrance and exit through a designated exit. Do not block fire exits.

• Encourage staff, players and spectators to stay outside of the premises (e.g. in vehicles) until scheduled practice or play time. This allows people to leave the premises before entering and minimizes gathering.

Travel
Out of state travel may increase the likelihood of disease transmission. Long haul flights, including domestic, in and of themselves, pose a moderate risk of transmission. Of greater concern, and subsequently higher risk, is the increased exposure during transit at airports.

If athletes are traveling to or from an outdoor recreation and outdoor fitness establishment, they are required to:

• Limit exposure to those outside the travel unit during transit:
  ▪ All members of a travel unit including drivers, if on a bus or in a car, must wear a mask, face shield or face covering and ensure a minimum of three (3) feet between passengers within the travel unit.
  ▪ Limit travel to those who have been in regular contact and are considered essential personnel (i.e., athletes, coaches, medical staff).

• Air travel
  ▪ When able, consider charter flights instead of commercial air travel. Commercial air travel should be on a carrier with robust infection control methods and enforcement of universal masking requirements.
  ▪ Carry hand sanitizer that contains 60-95% alcohol content at all times and use it frequently.
  ▪ Wear masks or face coverings at all times and minimize removal for eating or drinking.
  ▪ Avoid traveling on the same private plane with a different team.

• Document the names of all passengers including the driver, pilot and flight staff, along with the date and time of the trip and the vehicle number/license, if applicable.

• Allow drivers to transport multiple travel units if wearing a mask and sanitizing hands before and after each driving each group. Vehicles must be cleaned between transport of each travel unit following transportation guidelines.

• If experiencing COVID-19 symptoms, contact health care provider for testing.

• Cooperate with Local Public Health Authority, if contacted, for purposes of contact tracing.
To the extent possible, athletes traveling to or from an outdoor recreation and outdoor fitness establishment should, but are not required to:

- Follow the [OHA Guidance (Recommendations) for Travel](https://www.oha.state.or.us/health/orders/latest).
- Travel and play the same day to avoid overnight stays, when feasible. For overnight stays or same-day travel, prepackaged meals or room service should be considered. If restaurant dining is the only option, consider take-out food or outdoor eating as alternatives.

### Adult and Family Camps

#### Operations

Operators of adult and family camps are required to:

- Comply with the [Statewide Mask, Face Covering, Face Shield Guidance](https://www.oha.state.or.us/health/orders/latest).
- Comply with the maximum capacity limits based on the designated level of risk for the county in which the camp is located.
- Comply with this guidance – Outdoor Recreation and Fitness Establishments – to the extent requirements are applicable to a particular adult or family camp operation.
- Comply with additional [OHA sector guidance](https://www.oha.state.or.us/health/orders/latest), as applicable.
- If licensed by OHA or the local public health authority (LPHA) under ORS Chapter 446, comply with requirements for Organizational Camps in [Oregon Administrative Rules 333-030](https://www.olina.org/laws/333-030).

- Train staff on all requirements in this guidance prior to the formal start of the program. If staff training is conducted in person, six (6) feet physical distancing must be maintained to the maximum extent possible. This includes training on COVID-19 facts, cleaning/sanitation and safety.
- Provide hand sanitizer, handwashing facilities, tissues and garbage receptacles that are easily accessible to both participants and staff.
- For indoor activities, ensure that ventilation systems operate properly. Increase air circulation and ventilation as much as possible by opening windows and doors. Fans should only be used when windows or doors are open to the outdoors in order to circulate indoor and outdoor air. Do not open windows and doors if doing so poses a safety risk to participants and staff.
- Prohibit outside visitors from the program, except for critical service providers such as medical staff or emergency personnel and visitors, vendors, and others essential for safe and effective operations of the program.
- Avoid use of items (for example pillows, bolsters) that are not easily cleaned.
- Ensure that potable and process water plumbing systems are appropriately readied prior to camp in accordance with [CDC, OHA and LPHA](https://www.oha.state.or.us/health/orders/latest) guidance to minimize the risk of diseases associated with waterborne pathogens. If the camp is served by a seasonal public water system, follow [OHA guidance for start-up of seasonal water systems](https://www.oha.state.or.us/health/orders/latest).

- If licensed by OHA or the LPHA under ORS Chapter 446, comply with requirements for Organizational Camps in [Oregon Administrative Rules 333-030](https://www.olina.org/laws/333-030).
• If operating a pool, comply with the indoor or outdoor recreation and fitness establishments pool guidance, as applicable. Individuals and staff swimming or boating outdoors in lakes and other bodies of water, should keep six (6) feet apart and follow all hand-washing and other hygiene recommendations.
  ▪ Follow the guidance in the locker room section if operating a locker room.

Operators of adult and family camps should, but are not required to:
• Restrict participants and staff from leaving and returning to camp to the greatest extent possible.
  ▪ Consider having participants and staff remain on site for the duration of the camp session with exceptions to attend outside medical or other essential visits.
  ▪ Remind those who leave camp to follow all state and local COVID-19 mitigation guidelines to minimize their risk of exposure.
• Encourage individuals at higher risk of severe COVID-19 to stay home. The nature of group gatherings raises risk for individuals with certain health conditions. These groups are at higher risk of poor outcomes with COVID-19. Campers and employees in higher risk groups are strongly recommended not to attend camp programs. Refer to the CDC’s information on people at increased risk for severe illness.

Screening for symptoms. What if someone is sick?
Operators of adult and family camps are required to:
• Ensure all participants and staff verify that they are symptom free and have not had any known exposure to individuals diagnosed with COVID-19 during the 14-day period prior to arrival at camp.
• Check for new COVID-19 symptoms for anyone entering the program facility/area. This can be done visually as well as by asking participants and staff about any new symptoms or close contact with someone with COVID-19.
• Record participant, staff and visitor contact information upon check-in. If there is a positive COVID-19 case associated with the camp, public health officials may need the camp operator to provide this information for a contact tracing investigation. Unless otherwise required, this information may be destroyed after 60 days from the session date.
• Keep daily logs for each cohort. These logs must be maintained for a minimum of four weeks after the end of the program and must include the following information to support contact tracing, if necessary:
  ▪ Participant name
  ▪ Emergency contact information for each participant
  ▪ Names of all staff that interact with a cohort
  ▪ Daily health checks of each participant, noting if check was a pass or fail (do not note specific information)
  ▪ Daily health checks should include an assessment of the participant by staff to ensure the participant is not exhibiting COVID-19 symptoms.
• If transportation is provided by the program, comply with the travel requirements in this guidance.

• Direct staff and participants to stay home if they have COVID-19 symptoms. COVID-19 symptoms are as follows:
  ▪ Primary symptoms of concern: cough, fever (temperature of 100.4°F or higher) or chills, shortness of breath, difficulty breathing, or new loss of taste or smell.
  ▪ Note that muscle pain, headache, sore throat, diarrhea, nausea, vomiting, new nasal congestion, and runny nose are also symptoms often associated with COVID-19. More information about COVID-19 symptoms is available from the CDC.

• If a participant or staff member exhibits or develops a new cough (e.g., unrelated to pre-existing condition such as asthma), fever, shortness of breath or other primary symptoms of COVID-19 during the session, separate from others and send them home as soon as possible.
  ▪ While waiting for a sick participant to be picked up, a staff member must stay with the participant in an area away from others. The staff member must wear a face covering and should remain as far away as safely possible from the participant (preferably at least six (6) feet), while remaining in the same room or outdoor area.
  ▪ The sick participant or staff member is strongly encouraged to get tested. If they test positive, or do not have testing performed, they must stay home for at least 10 days after illness started and until 24 hours after fever resolves without the use of medication and other COVID-19 symptoms are improving.

• Ensure that the program has flexible sick-leave and absentee policies that allow staff to stay home while sick or required to quarantine.

• Report to and work with the LPHA about cleaning and possible need for closure if anyone who has entered the program facility is diagnosed with COVID-19.
  ▪ Report to the LPHA any cluster of illness among the program staff or participants.
  ▪ In the event that there is a single case or a cluster of cases of COVID-19 in a program, the program must partner with the LPHA, who will advise on any need for isolation or quarantine of person(s) or cohort(s) and provide support with ongoing COVID-19 mitigation efforts. In some situations, full program closure could be required; careful observance of all guidance is necessary to avoid this scenario.

• Portions of facilities hosting overnight camps may be rented to outside groups during camp sessions if there is no mingling between the renters and the campers. Two or more programs may run simultaneously at the camp if the groups do not interact and physical distancing guidelines are met.

**Lodging**

**Operators of adult and family camps are required to:**

• Ensure there is at least 30" between beds or sleeping spaces and that campers sleep head-to-toe (e.g., top bunk has the person’s head at one end, the bottom bunk has the person’s head at the other end; and adjacent top bunks and bottom bunks similarly are arranged so that the head of a person in one bed is at the other end as the head of the
person in the next bed). This applies to cabins, tents and other sleeping arrangements where participants from more than one household are in proximity to each other.²

**Physical distancing**

**Operators of adult and family camps are required to:**

- Group participants into cohorts of no more than 30 participants. Although 30 is the limit, programs should use the smallest cohort size(s) feasible for several reasons: (1) risk of exposure to someone with COVID-19 increases significantly with increasing group size; (2) smaller groups are generally easier to manage and ensure that public health requirements are being followed consistently; and (3) smaller groups reduce the number of people who may be exposed and the number who would have to quarantine, reducing disruptions to the program as a whole.
  - The cohort may change no more frequently than once per week (e.g., for programs operating on a weekly schedule).
  - Programs hosting different morning and afternoon groups may be offered. Cleaning steps must be taken between these sessions.
  - A program can have multiple cohorts if the facility or site can accommodate physical distancing for the number of participants hosted. Each cohort must have at least one staff member who is continuously responsible for the group.
  - Cohorts consist of participants and staff; the number of staff needed for a cohort does not count toward the cohort total (i.e., staff do not count as one of the 30 participants in a cohort). Staff should remain with a single group as much as possible. Staff who interact with multiple cohorts must wash their hands between interactions with different stable groups.
  - **Before and after care:** Cohorts must be limited to no more than 30 participants at a given time. Participants cannot be part of more than two cohorts (including transportation) in any given week.
  - No staff member is permitted to interact with more than three cohorts in a given day and five in a given week.
- If multiple cohorts are checking in to a program at the same time, designate separate spaces during check-in for each cohort to maintain physical distancing requirements.
- Ensure that each cohort does not mix with any other group when indoors. When feasible, cohorts that are indoors should remain in one space for the duration of the day, or only use indoor spaces that have not been used by other cohorts that day.
- If multiple cohorts join for outdoor programs or activities, ensure that all people are wearing face coverings and maintaining six (6) feet physical distancing to the maximum extent possible.

² This guidance is based on the specific and unique conditions of short-term, tourist and youth overnight camps and does not necessarily apply in other contexts.
• Support physical distancing during daily activities and classes and maintain at least six (6) feet of distance between individuals. For example, structure programming in the following ways:
  ▪ Eliminate large group activities.
  ▪ Plan activities that do not require close physical contact among multiple participants.
  ▪ Frequently clean shared equipment. This includes, but is not limited to, equipment such as art supplies, musical instruments and shared sports equipment.
  ▪ Minimize time standing in lines and take steps to ensure that six (6) feet of distance is maintained between individuals.
  ▪ Provide greater physical distance between participants for activities that include singing, shouting, cheering or playing brass or woodwind instruments because these instruments may spread respiratory droplets farther than six (6) feet.
  ▪ Use the largest spaces practical for group activities and hold activities outside if feasible.

• Program operators are not required to provide separate restrooms for each cohort. However, restroom use must be limited to one cohort at a time.
  ▪ Open restroom windows and operate built-in fans, as feasible, to improve ventilation.
  ▪ OHA recommends allowing at least 15 minutes between restroom use by different cohorts. Youth will not be wearing face coverings when using the restrooms for activities like showering and brushing teeth. Opening doors and windows between use by different cohorts can reduce aerosols in the restrooms and minimize the spread of COVID-19.

Field trips/transportation
All programs are required to:
• Comply with the requirements under the Travel section of this guidance.
• To the extent possible, do not mix different cohorts in one vehicle.
• Maximize fresh air flow in vehicles to the extent possible by opening windows and using fresh (non-recirculated) air settings on ventilation systems.
• Review and follow the OHA Travel Recommendations

Food service
All programs are required to:
• If licensed as an Organizational Camp by OHA or the local public health authority (LPHA) under ORS Chapter 446, comply with requirements for food service in Oregon Administrative Rule 333-030-0095.
  ▪ Camps that are not licensed under ORS Chapter 446 must not prepare food but may order food from a restaurant.
• Ensure all participants and staff wash hands with soap and water prior to eating. In limited circumstances (e.g., backcountry camps) where use of soap and water is not possible because of lack of running water, using alcohol-based hand sanitizer containing 60-95% alcohol is acceptable.

• Maintain six (6) feet of physical distancing during meals when face coverings are removed to eat.

• Keep cohorts separate during meals to the maximum extent feasible, using designated seating areas and natural or artificial barrier(s) between cohorts.

• Encourage participants to bring their own food if possible. Participants must be told not to share food with other campers.

• Comply with the Sector Guidance for Self-Service Operations.

Additional requirements

• Per ORS 419B.005, an “employee of a public or private organization providing child-related services or activities” is considered a mandatory reporter. During the COVID-19 crisis, child abuse reporting has decreased by more than 60%. Programs must include training to recognize and report suspected child abuse and neglect. Staff can report any suspected child abuse by calling 1-855-503-SAFE (7233). Additional resources can be found through the Early Learning Division and Oregon Department of Education.
