Phase One and Phase Two Reopening Guidance – Fitness-related Organizations

Authority: Executive Order No. 20-27, ORS 443.441, ORS 433.443, ORS 431A.010

Applicability: This guidance applies to fitness-related organizations including but not limited to gyms, fitness centers, personal training, dance studios, and martial arts centers in Phase One and Phase Two counties.

Enforcement: To the extent this guidance requires compliance with certain provisions, it is enforceable as specified in Executive Order 20-27, paragraph 26.

Definitions: For purposes of this guidance, the following definitions apply:

- “Full-contact sports” means sports that involve a requirement or substantial likelihood of routine, sustained close proximity or physical contact between participants, and includes but is not limited to football, rugby, wrestling, cheerleading, basketball, hockey, dance, water polo, men’s lacrosse.
- “Minimal- and medium-contact sports” include but are not limited to softball, baseball, soccer, volleyball, women’s lacrosse, flag football.
- “Non-contact sports” include but are not limited to tennis, swimming, golf, cross-country, track and field, sideline/no-contact cheer and dance.

Distancing and Occupancy:

Fitness-related organizations are required to:

- Limit the capacity to a maximum of 100 people indoor or 250 people outdoor, not to exceed 250 indoor and outdoor; or the number of people, including staff, based on a determination of capacity (square footage/occupancy), whichever is less.
- Limit fitness class size to maximum occupancy of the room (as long as it ensures six (6) feet of separation).
- Consider holding fitness activities or classes outdoors if it can be done safely, when it does not violate any local ordinances, and when participants and instructors can maintain six feet of physical distance. Limit exercise equipment stations to those located at least six (6) feet apart. If equipment cannot be moved to facilitate physical distancing, it must be blocked from being used.
- Prohibit full contact sports.

- Only allow gymnasiums to be used for non-contact sports or individual skills development not requiring contact with other people.
- For one-to-one personal training, maintain six (6) feet of physical distance between trainer and client. Trainer and client should thoroughly wash hands with soap and warm water or use hand sanitizer (60-95% alcohol content) immediately before and after appointment.

Operations:

Fitness-related organizations are required to:

- Review and implement [Statewide Mask, Face Shield, Face Covering Guidance](#).
 - All staff and clients are required to wear a mask, face shield or face covering when exercising indoors. All staff and clients are required to wear a mask, face shield or face covering when exercising outdoors when six (6) feet of distance cannot be maintained.
- Ensure all facilities and equipment are safe to operate and are in good condition after the extended closure. Maintenance and operations manuals and standard operating procedures should guide this work.
- Close water fountains, except for those designed to refill water bottles in a contact-free manner.
- Keep saunas and steam rooms closed.
- Operate pools for recreational swim activities, swimming lessons, and all other aquatic activities following the [Phase One and Phase Two Licensed Swimming Pools, Licensed Spa Pools and Sports Courts guidance](#).
- Keep drop-in childcare closed.
- Refer to and apply [Guidance for School Aged Summertime Day Camps](#) for any children and youth programs.
- Post [clear signs](#) listing COVID-19 symptoms, asking employees and clients with symptoms to stay home, and listing who to contact if they need assistance.
- Use [signs](#) to encourage physical distancing throughout facility, including but not limited to reception areas, eating areas, locker rooms, and near popular equipment.
- Position staff to monitor physical distancing and disinfecting requirements.
- Ensure that ventilation systems operate properly. Increase air circulation and ventilation as much as possible by opening windows and doors. In indoor spaces, fans should only be used when windows or doors are open to the outdoors in order to circulate indoor and outdoor air. Do not open windows and doors if doing so poses a safety risk to employees, children or customers.
- Establish one-way traffic flow, where possible, for equipment circuits, tracks, etc. Use signs to direct one-way flow of traffic.
- Provide handwashing stations or hand sanitizer (60-95% alcohol content) throughout the facility for use by employees and clients.
- Refer to [Restaurant Sector Guidance](#) for information about food handling and distribution as applicable to each fitness facility.

- Review and implement [General Employer Guidance](#).

To the extent possible, fitness-related organizations should, but are not required to:

- Consider placing clear plastic or glass barriers in front of reception counters, or in other places where maintaining six (6) feet of physical distance between employees and clients is more difficult.
- Consider having gym time by appointment to limit number of people in the facility. Encourage use during non-peak times as determined and publicized by facility management.
- Consider offering virtual fitness classes, especially for persons at higher risk for severe COVID-19 complications such as people over 60 or with underlying medical conditions.
- Encourage one-way flow with marked entrances and exits, but do not block egress for fire exits. Use signs to direct one-way flow of traffic.
- Strongly encourage clients to bring their own filled water bottles with them to the facility.

Locker Rooms:

If the fitness-related organization allows locker room use, fitness-related organizations are required to:

- Develop and implement a plan to limit the number of individuals using showers and changing rooms at the same time.
- Develop and implement a plan to keep at least six (6) feet of physical distance between people.
- Ensure that the locker room does not exceed maximum occupancy. Use the total square footage of the locker room to determine the maximum occupancy of the locker room based on a minimum of 35 square feet per person.
- Assign a physical distancing monitor to ensure individuals follow all physical distancing requirements, including at entrances, exits, restrooms and any other area where people may gather.

Cleaning and Disinfection:

Fitness-related organizations are required to:

- Thoroughly clean all areas of fitness-related organization prior to reopening after extended closure.
- Use disinfectants that are included on the [Environmental Protection Agency \(EPA\) approved list](#)¹ for the SARS-CoV-2 virus that causes COVID-19. No product will be labeled for COVID-19 yet, but many will have human coronavirus efficacy either on the label or available on their website.
- Require employees or facility guests to wipe down all equipment (e.g., balls, weights, machines, etc.) immediately before and after each use with a disinfectant provided by

¹ <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

the gym that is included on the EPA-approved products for the SARS-CoV-2 virus that causes COVID-19. A solution of 70%-95% alcohol content also works.

- Frequently clean and disinfect work areas, high-traffic areas, and commonly touched surfaces in areas accessed by workers and public.
- Thoroughly clean restrooms at least twice daily and ensure adequate sanitary supplies (e.g., soap, toilet paper, 60-95% alcohol content hand sanitizer) throughout the day.

To the extent possible, fitness-related organizations **should**, but are not required to:

- Strongly encourage clients to wash hands with soap and water for 20 seconds and/or use hand sanitizer (60-95% alcohol content) immediately before and after gym session as well as several times during the session.
- Flush water pipes weekly while the building is vacant and prior to resuming normal building use. Stagnant water in pipes can create conditions that favor the growth and spread of Legionella and other harmful bacteria (see [Guidance for Reopening Building Water Systems after Prolonged Shutdown](#)).

Client Screening:

Fitness-related organizations are required to:

- Record client contact information, date and time for client facility use. If there is a positive COVID-19 case associated with the facility, public health officials may need the business to provide this information for a contact tracing investigation. Unless otherwise required, this information may be destroyed after 60 days from the session date.

To the extent possible, fitness-related organizations should, but are not required to:

- Screen clients prior to start of their session in the facility such as asking:
 - Have you had a new or worsening cough?
 - Have you had a fever?
 - Have you had shortness of breath?
 - Have you been in close contact with anyone with these symptoms or anyone who has been diagnosed with COVID-19 in the past 14 days?

If the client responds “yes” to any of the screening questions, ask them to return home and wait to return to the facility until all symptoms, including fever have been resolved for at least 24 hours without medication, or at least 14 days after contact with a person with a cough, fever, or diagnosed with COVID-19.

- Strongly encourage a client exhibiting symptoms of illness to immediately leave the facility and not return until at least 24 hours after symptoms have resolved without medication.
- Strongly encourage clients at higher risk for severe COVID-19 complications (persons over age 60 or with underlying medical conditions) to continue to stay home to reduce their risk of exposure.
