

Mandatory Public School Metrics for Returning to In-Person Instruction Through the On-Site or Hybrid Model

All public and private schools are responsible for understanding their schools' data to determine the safest instructional model to operate. New metrics data is released each Monday. Using a single, two week "look back" of countywide data, start with the left-hand side column to map your county case rate or county case count (whichever applies). When a decision is made to return to in-person instruction, considering setting at a date in the near future in order to support district planning and staff training, family communication and a more gradual opening.

Counties are identified as large, medium, and small. Large counties have a population greater than 30,000. Medium size counties are between 15,000 and 30,000. Small counties have a population less than 15,000. These size distinctions match Oregon's Risk and Protection Framework.

Small = Less than 15,000 Medium = 15,000 to 29,999 Large = 30,000 or more

Public School Instructional Model Requirements and Options <i>Public schools must provide a CDL option for students and families that choose to remain off-site.</i>	County Case Rate <i>Per 100,000 people over 14 days in large counties</i>	County Case Count <i>Over 14 days for small and medium counties</i>	County Test Positivity <i>Over 14 days for medium and large counties</i>
Public K-12 schools <i>must</i> offer an On-Site or Hybrid option	<200.0	<60	<10.0%
Public Elementary schools <i>must</i> offer an On-Site or Hybrid option <i>*Public middle and high schools are not required to initially open to in-person instruction and may limit to CDL only as needed to address any current transmission within a school.</i>	200.0 to ≤350.0	60 to ≤90	≤10.0%
Public schools <i>may</i> limit to Comprehensive Distance Learning (CDL) <i>*K-12 public schools are not required to initially open to in-person instruction and may limit to CDL exclusively if needed to address any current transmission within a school.</i>	>350.0	>90	>10.0%
<i>*Schools should <u>not</u> reduce in-person instruction or revert to CDL based on county metrics if the school can demonstrate the ability to limit transmission in the school environment. When county trends increase to a new tier on this chart (green-to-yellow or yellow-to-red), pausing expansion of additional in-person learning and maintaining access to current in-person learning for schools that have it in place is recommended.</i>			

Note: If the applicable metrics place a county in different rows of this table, the more restrictive operating status is indicated and advised. For example, if a large county has a case rate of 185 and test positivity of 15% - CDL is indicated and advised unless already operating in-person.

Weekly Monitoring Periods From May 23 – June 19

This table is based on data pulled at 12:01 AM on June 21, 2021. For case counts and case rates, cases are assigned to a week based on their true case date, which is the date when public health first identified them as a confirmed or presumptive COVID-19 case. For percent positivity in testing, lab results are assigned to a week based on the date their test result was reported to Public Health. All data are provisional and subject to change.

County	County Size	Time Period	Recommmendations	Case Count	Cases per 100,000	Test Positivity
Baker	Medium‡	05/23/2021 - 06/05/2021	K-12 On-Site or Hybrid	20	118.3	3.4%
