

## Johnson & Johnson COVID-19 Vaccine

**All three approved COVID-19 vaccines are safe and highly effective.**

With three vaccines now available, Oregonians should get vaccinated as soon as possible.

### Fast facts about the Johnson & Johnson vaccine:

It is very safe and highly effective against hospitalization and death from COVID-19. However, certain extremely rare blood clots have been associated with its use in women ages 18 to 59.

It is 85% effective against severe illness. This means that those who received the vaccine were 85% less likely to develop severe illness from COVID-19 than those who did not receive vaccine.

After a thorough safety review, the FDA and CDC have affirmed that the benefits of this vaccine greatly outweigh the risk of severe side effects. The FDA has published [new information](#) about the potential for a rare risk of blood clots and low platelets.

Like the other COVID-19 vaccines, it is very effective against COVID-19 variants.

It is one more tool in our toolbox. The more vaccines and options we have available, the faster we can all get vaccinated and reduce the spread of COVID-19.
