

Halloween Safety Tips

Trick-or-treating?

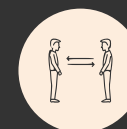

Everyone 12 and older should get a COVID-19 vaccine.

Wear a costume that allows you to wear a COVID-safe mask.

Trick or treat in small groups and avoid crowds, particularly indoors.

Maintain 6 feet of distance from people you don't live with.

Handing out treats?

- Wear a face covering.
- Distribute candy outside if possible.
- Limit the number of kids at the door at the same time so there aren't too many hands in the bowl.
