

COVID-19 Vaccine Doses

Vaccine dosage	First dose	Second dose	Third dose* (for immune-compromised only)	Booster dose*
Pfizer pediatric (Ages 5–11)	0.2 mL	0.2 mL	0.2 mL	Not recommended
Pfizer (Ages 12+)	0.3 mL	0.3 mL	0.3 mL	0.3 mL
Moderna (Ages 18+)	0.5 mL	0.5 mL	0.5 mL	0.25 mL
Janssen (J&J; Ages 18+)	0.5 mL	Not recommended	Not recommended	0.5 mL

*The CDC recommends everyone age 12 and older get a booster dose when they are eligible: five months after their second dose of a Pfizer or Moderna vaccine and two months after a Janssen (Johnson & Johnson) vaccine dose. This includes people who are immunocompromised and received a third dose of Pfizer or Moderna.
