

# Bebtelovimab One Pager

Updated 3/2/2022

## Q: What is Bebtelovimab?

A: Bebtelovimab is a medicine for treatment of mild-to-moderate COVID-19 disease. The U.S. Food and Drug Administration (FDA) first authorized its use in February 2022. This medicine is used to treat infection. It cannot prevent it.

## Q: Who is Bebtelovimab for?

A: Bebtelovimab is for people 12 years of age and older who are at high risk for severe COVID-19 disease and have tested positive for COVID-19. It is for people who do not have access to other FDA-authorized treatment options.

## Q: How is it administered?

A: Bebtelovimab is given as an injection in the vein

## Q: Is bebetlovimab available now?

A: Yes
