Welcome Readers

**Welcome to the Oregon Health Authority (OHA)
COVID-19 Therapeutics Newsletter!**

The purpose of this newsletter is for our team to stay connected with Oregon. We aim to keep you up to date on all things COVID-19 therapeutics, events, equity, inclusion, and provide additional resources. OHA is committed to equity and increasing access to COVID-19 treatments for Oregonians who need it.

COVID-19 Therapeutics Updates

Test to Treat (T2T)

The **Test to Treat (T2T) program** connects eligible people who are at high risk of severe COVID-19, to treatments. These locations provide access for people to get tested, receive a prescription from a healthcare provider, and fill that prescription, all at one place or have your prescription sent to a nearby pharmacy. The Test to Treat (T2T) Locator helps you find places that provide these services. **Keep in mind, many of the sites, including some Federally Qualified Health Centers (FQHCs), have telehealth capability. For example, the Walgreens sites listed on the locator have telehealth capability through Providence Express Care.**

If you are uninsured, have trouble paying for healthcare, or need additional resources, FQHCs listed as Test to Treat are a great option.

In addition to Walgreens, please see the list below for additional Test to Treat sites.

FQHCs

- Virginia Garcia Memorial Health Center in Hillsboro
- One Community Health in Hood River
- One Community Health in The Dalles
- Valley Family Health Care in Ontario
- Valley Family Health Care in Nyssa
- Valley Family Health Care in Vale
- Central City Concern Blackburn Center in Portland
- Central City Concern Old Town Clinic in Portland

Urgent Cares

- St. Charles Urgent Care in Prineville
- St. Charles Urgent Care in Bend

- St. Charles Urgent Care in La Pine

Oregon Health Plan (OHP)

Folks can get treatment for little to no cost. **As of July 1st, 2022, more adults are now eligible for benefit and other services, regardless of their immigration status.** You can visit the [Healthier Oregon](#) website to learn more or view the [Healthier Oregon FAQ](#).

You can also visit [Oregon Health Plan \(OHP\) webpage](#) for information on eligibility and how to apply. Enrollment is always open and Medicare and private health insurance plans have open enrollment in the fall. If you are unsure if OHP is right for you, you can go to [OregonHealthCare.gov](#) to help you find the application that works best for you and your family.

Allocation Data

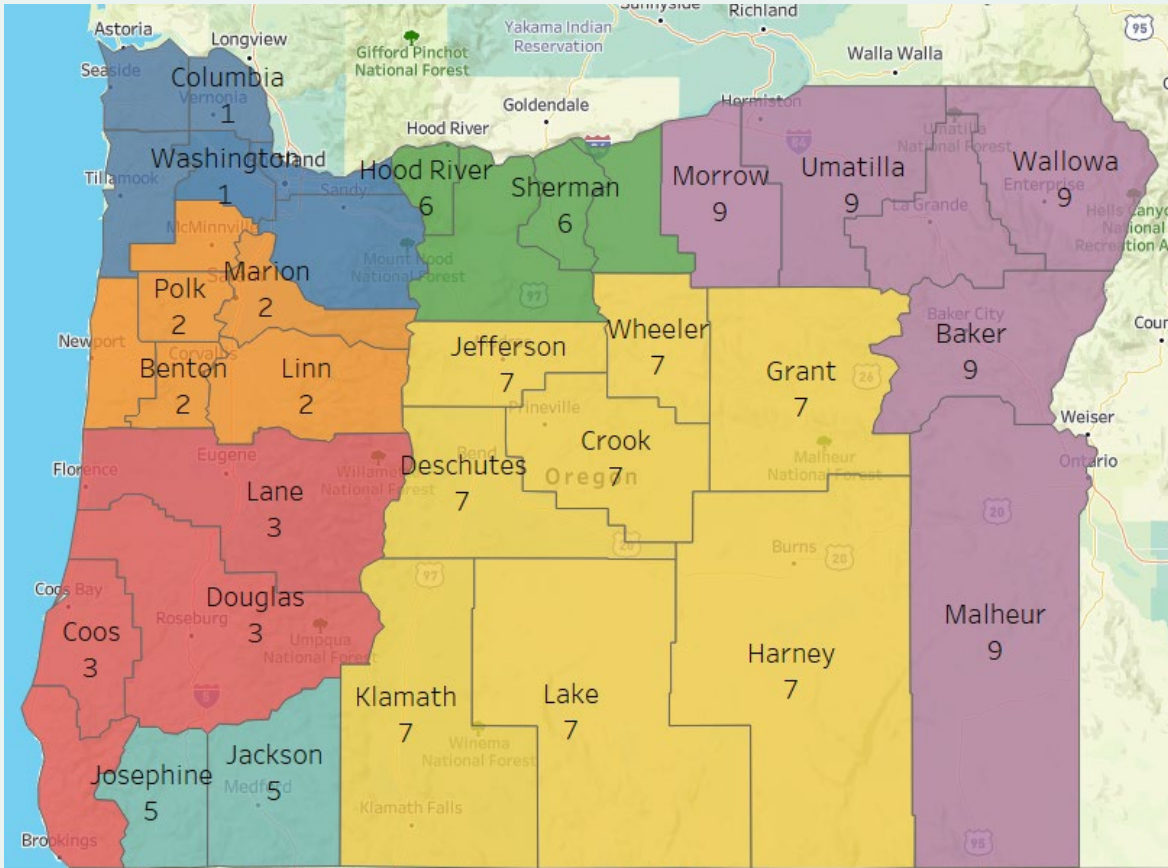

What is Allocation?

The federal government chooses how much COVID-19 treatments each state receives. OHA then decides which sites in Oregon receive treatment and how much.

Oregon is split into smaller regions that have counties within it. **The map** shows how Oregon is separated and can give a better picture on what counties are in each region.

The table shows how many of each treatment OHA allocated to sites within Oregon in the last month. **Please note** that this only shows what OHA has allocated and **does not include** amounts provided to pharmacies by the federal government.

Regions in Oregon (By Counties)

Region 1
Region 2
Region 3
Region 5
Region 6
Region 7
Region 9

Statewide (07/01/2022 – 07/30/2022)

Treatment Type	Treatment Name	Amount Allocated
Monoclonal Antibodies (mAbs)	Bebtelovimab	1,185
	Evusheld*	816
	Total mAbs	2,001
Antivirals	Lagevrio (molnupiravir)	288
	Paxlovid	3,660
	Renal Paxlovid	385
	Total Antivirals	4,333

***Evusheld** is used to prevent COVID-19 infection in people who have moderate to severe immune compromise due to a medical condition or can't get the vaccine due to medical reasons.

The federal government requires all states to share certain information about treatment administration. Currently, they require information about allocations, distribution, and daily utilization. The federal government does not require states to collect information about treatment administration based on race and ethnicity, therefore, OHA cannot provide this information.

Remdesivir is also a treatment for COVID-19 infection for adult and pediatric patients. Please note that this is commercially distributed, and OHA does not allocate this medication.
