## Welcome Readers

### Welcome to the Oregon Health Authority (OHA) COVID-19 Therapeutics Newsletter!

The purpose of this newsletter is for our team to stay connected with Oregon. We aim to keep you up to date on all things COVID-19 therapeutics, events, equity, inclusion, and provide additional resources. OHA is committed to equity and increasing access to COVID-19 treatments for Oregonians who need it.

# COVID-19 Therapeutics Updates

## Test to Treat (T2T)

The **Test to Treat (T2T) program** connects eligible people who are at high risk of severe COVID-19, to treatments. These locations provide access for people to get tested, receive a prescription from a healthcare provider, and fill that prescription, all at one place or have your prescription sent to a nearby pharmacy. [The Test to Treat \(T2T\) Locator](#) helps you find places that provide these services. **Keep in mind, many of the sites, including some Federally Qualified Health Centers (FQHCs), have telehealth capability. For example, the Walgreens sites listed on the locator have telehealth capability through Providence Express Care.**

**If you are uninsured, have trouble paying for healthcare, or need additional resources, FQHCs listed as Test to Treat are a great option.**

In addition to Walgreens, please see the list below for additional Test to Treat sites.

### FQHCs

- Virginia Garcia Memorial Health Center in Hillsboro
- One Community Health in Hood River
- One Community Health in The Dalles
- Valley Family Health Care in Ontario
- Valley Family Health Care in Nyssa
- Valley Family Health Care in Vale
- Central City Concern Blackburn Center in Portland
- Central City Concern Old Town Clinic in Portland

### Urgent Cares

- St. Charles Urgent Care in Prineville
- St. Charles Urgent Care in Bend
- St. Charles Urgent Care in La Pine

### Pharmacies

- Prescriptive Pharmacy in Redmond

**NOTE: Please refresh the locator site between each search**

### Oregon Health Plan (OHP)

Folks can get treatment for little to no cost. **As of July 1<sup>st</sup>, 2022, more adults are now eligible for benefit and other services, regardless of their immigration status.** You can visit the [Healthier Oregon](#) website to learn more or view the [Healthier Oregon FAQ](#).

You can also visit [Oregon Health Plan \(OHP\) webpage](#) for information on eligibility and how to apply. Enrollment is always open and Medicare and private health insurance plans have open enrollment in the fall. If you are unsure if OHP is right for you, you can go to [OregonHealthCare.gov](#) to help you find the application that works best for you and your family.

## Allocation Data

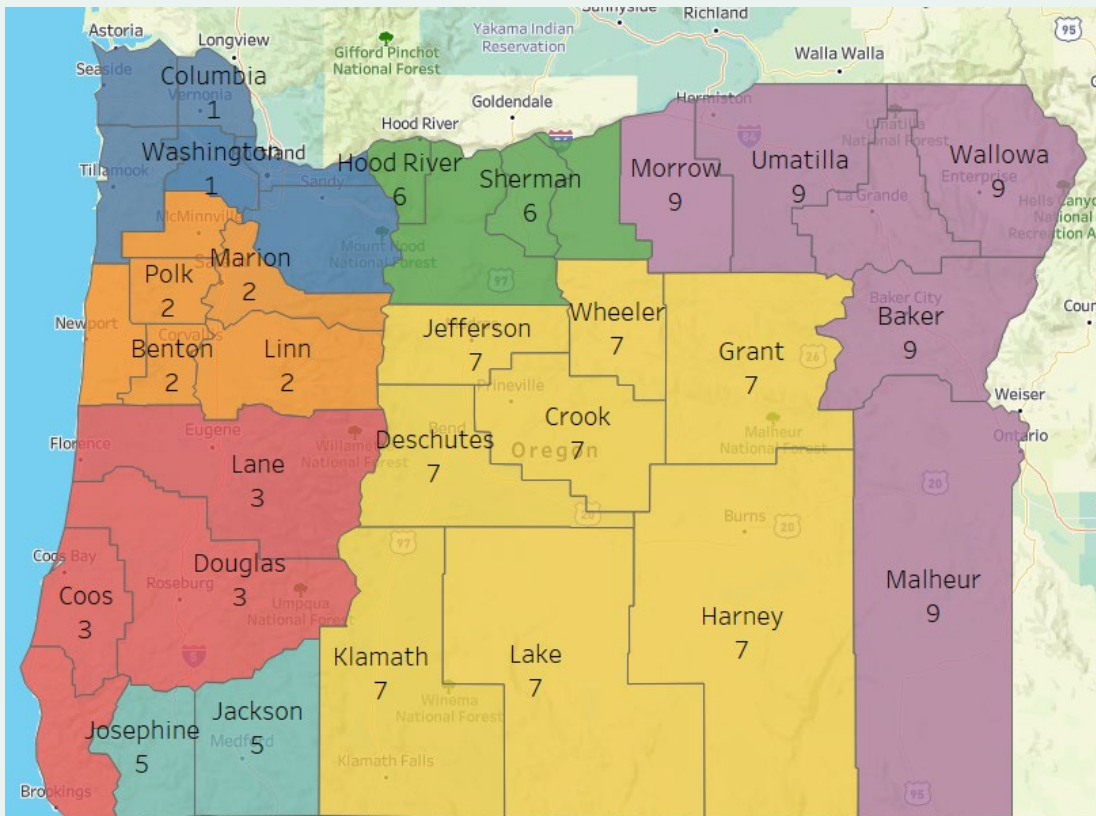

## What is Allocation?

The federal government chooses how much COVID-19 treatments each state receives. OHA then decides which sites in Oregon receive treatment and how much.

Oregon is split into smaller regions that have counties within it. **The map** shows how Oregon is separated and can give a better picture on what counties are in each region.

**The table** shows how many of each treatment OHA allocated to sites within Oregon in the last month. **Please note** that this only shows what OHA has allocated and **does not include** amounts provided to pharmacies by the federal government.

### Regions in Oregon (By Counties)

Region 1
Region 2
Region 3
Region 5
Region 6
Region 7
Region 9

**Statewide (08/01/2022 – 08/31/2022)**

<b>Treatment Type</b>	<b>Treatment Name</b>	<b>Amount Allocated</b>
Monoclonal Antibodies (mAbs)	Bebtelovimab	1,320
	Evusheld*	1,632
	<b>Total mAbs</b>	<b>2,952</b>
Antivirals	Lagevrio (molnupiravir)	216
	Paxlovid	2,820
	Renal Paxlovid	365
	<b>Total Antivirals</b>	<b>3,401</b>

\***Evusheld** is used to prevent COVID-19 infection in people who have moderate to severe immune compromise due to a medical condition or can't get the vaccine due to medical reasons.

The federal government requires all states to share certain information about treatment administration. Currently, they require information about allocations, distribution, and daily utilization. The federal government does not require states to collect information about treatment administration based on race and ethnicity, therefore, OHA cannot provide this information.

**Remdesivir** is also a treatment for COVID-19 infection for adult and pediatric patients. Please note that this is commercially distributed, and OHA does not allocate this medication.

**Bebtelovimab is now commercially available** which means that healthcare professionals can get it without going through OHA. OHA still has limited supply of Bebtelovimab remaining and will continue to distribute it, free of charge, to healthcare providers who serve underserved and uninsured communities, until the supply is gone.

# Events

## COVID-19 Therapeutics Webinars

### Previous Community Webinars

[English Recording - 7/29/2022](#)

[English Slide Deck](#)

[Spanish Recording - 7/29/2022](#)

[Spanish Slide Deck](#)

### Upcoming Community Webinar

**When:** September 16<sup>th</sup>, 2022

**Time:** 12:00pm – 1:00pm PST

[Click HERE to register!](#)

**\*Please Note:** A webinar link will be provided upon completion of registration

## Black COVID-19 Strategy Workgroup

### Purpose:

- Build community connections
- Learn about important COVID-19 updates and other urgent health topics
- Share and learn about resources
- Discuss non-COVID-19 related topics that affect our communities
- Promote Black joy and wellbeing

**When:** Third Wednesday of every month, **next session September 21<sup>st</sup>**

**Time:** 3:30pm – 5:00pm (PST)

### Upcoming Dates:
