

# COVID-19 Vaccination Schedules

Use the schedules below to determine how many total COVID-19 vaccine doses are recommended based on primary series product, age and immune status.

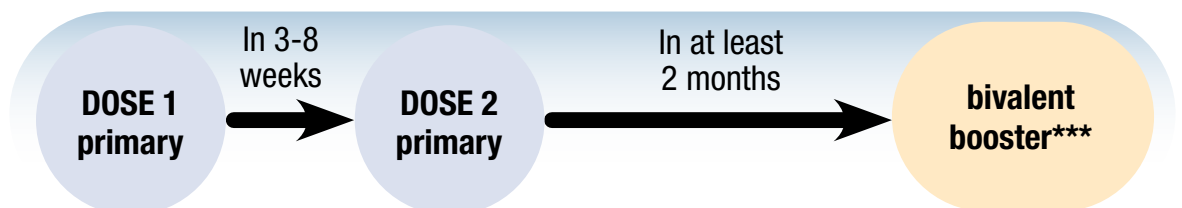

A single dose of a bivalent mRNA booster is available to all adults and most children. Children ages 6 months through 4 years who completed a three-dose Pfizer primary series are not eligible for a bivalent booster at this time.

## COVID-19 Vaccination Schedule for Most People

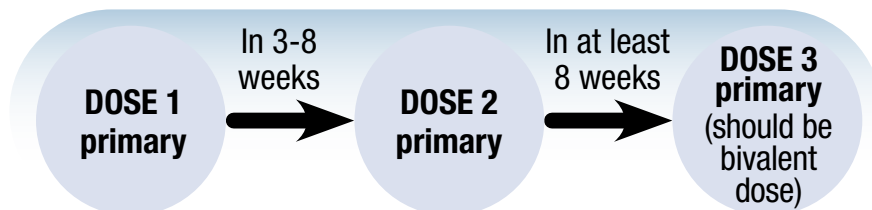

**Moderna**  
(age 6 months+)

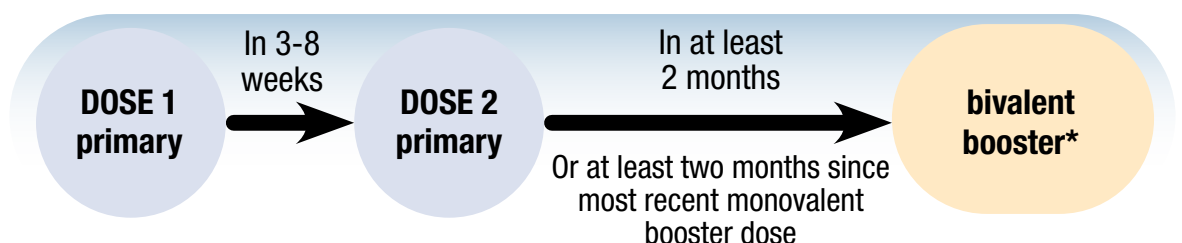

**Novavax**  
(age 12+)

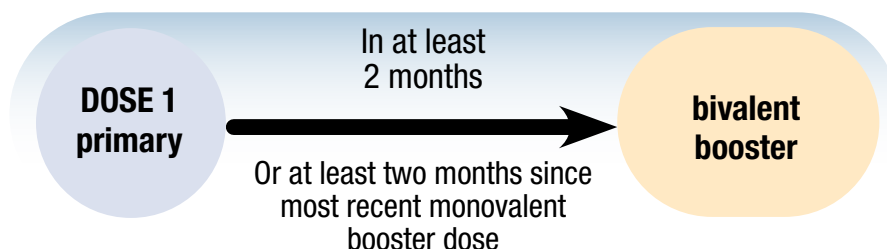

**Pfizer-BioNTech**  
(ages 6 months–4 years)

**Pfizer-BioNTech**  
(age 5+)

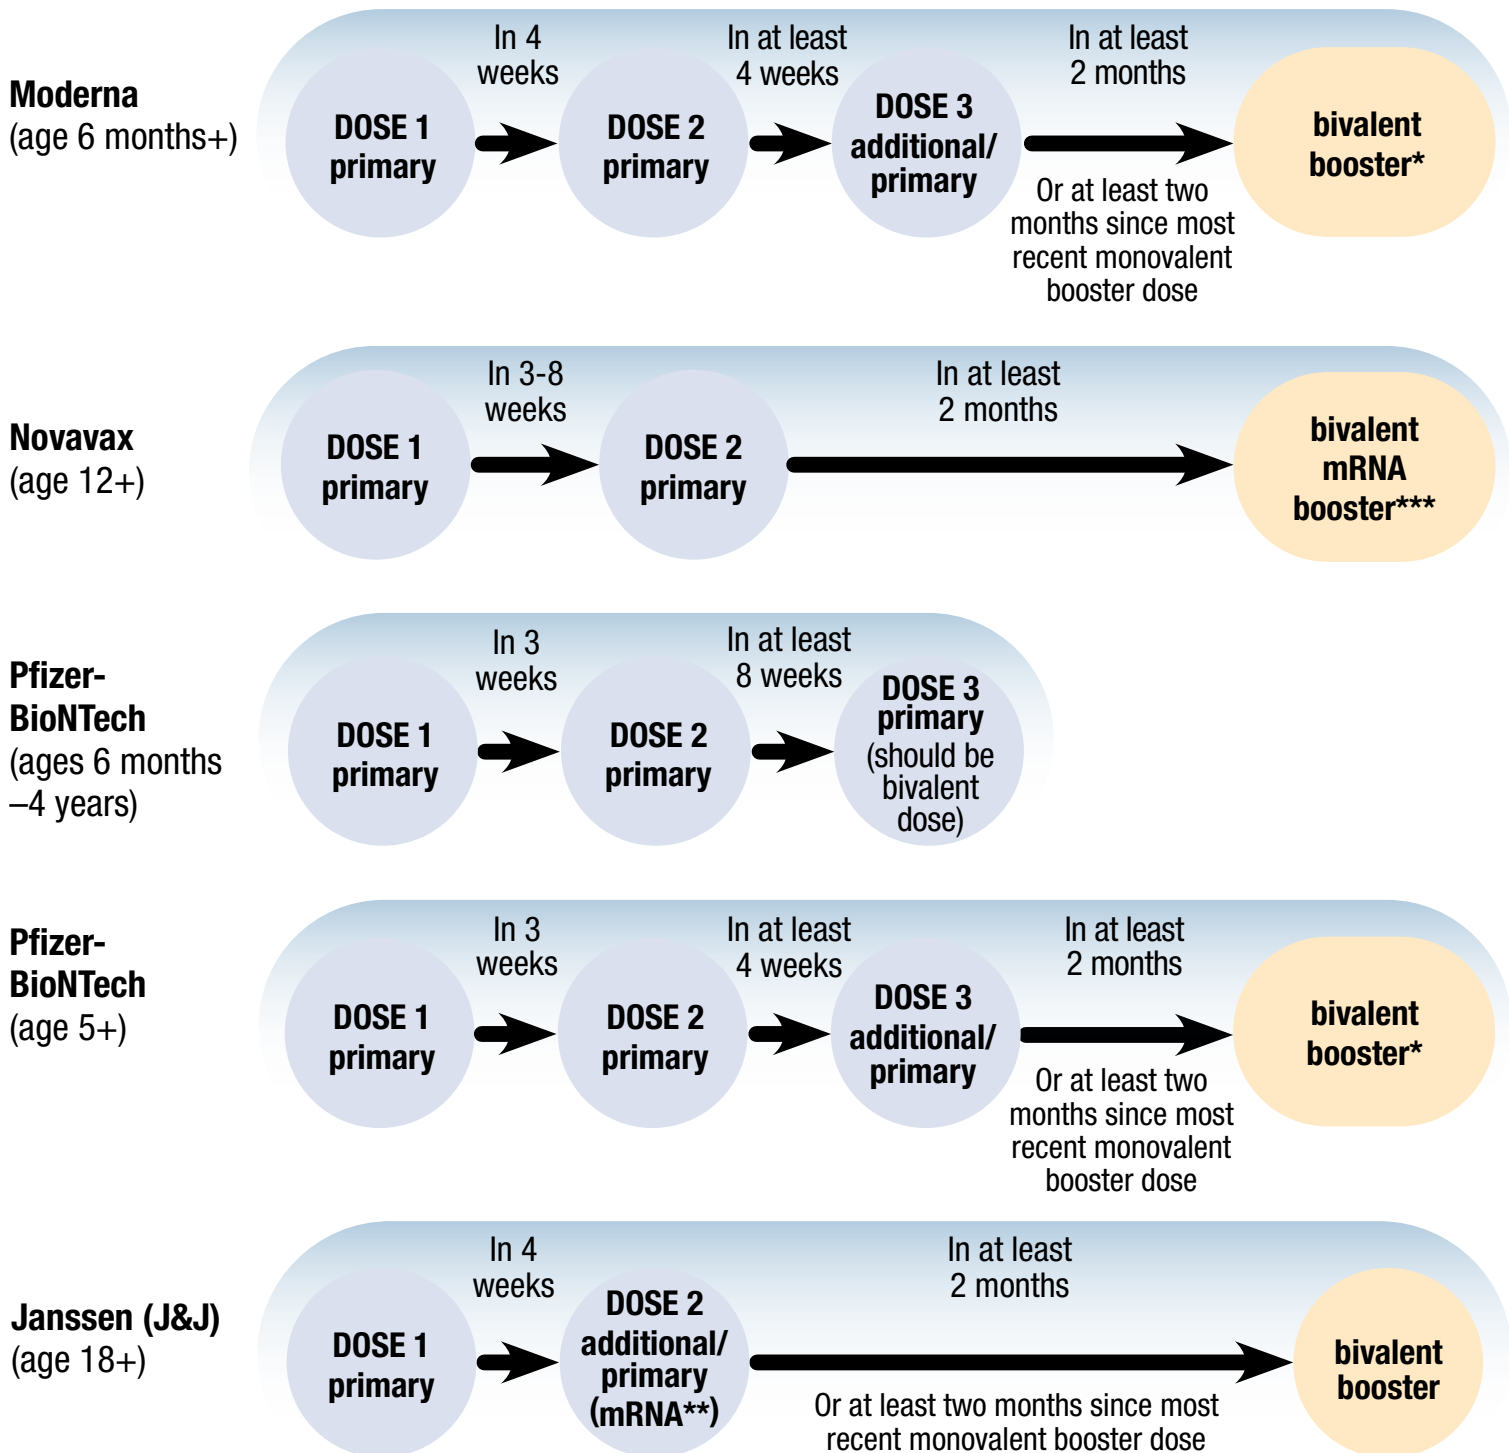

**Janssen (J&J)**  
(age 18+)

\*Moderna's bivalent booster is authorized for people age 6 months and older. Pfizer's bivalent booster is authorized for people age 5 years and older.

\*\*\*A Novavax booster dose is available if you are unable or unwilling to receive an updated Pfizer or Moderna booster dose and you meet the following requirements: Are 18 years of age or older, completed a COVID-19 vaccination series at least 6 months ago and have not received any other booster dose.

# COVID-19 Vaccination Schedule for People Who Are Moderately or Severely Immunocompromised

\*Moderna’s bivalent booster is authorized for people age 6 months and older. Pfizer’s bivalent booster is authorized for people age 5 years and older.

\*\*Age-appropriate mRNA (Moderna or Pfizer-BioNTech) and Novavax vaccines are recommended for primary vaccination. For additional doses, mRNA vaccines are recommended. Janssen COVID-19 Vaccine should only be used in limited situations for primary or booster vaccination. See: <https://www.cdc.gov/vaccines/covid-19/clinical-considerations/interim-considerations-us.html#considerations-Janssen>

\*\*\*A Novavax booster dose is available if you are unable or unwilling to receive an updated Pfizer or Moderna booster dose and you meet the following requirements: Are 18 years of age or older, completed a COVID-19 vaccination series at least 6 months ago and have not received any other booster dose.
