OREGON HEALTH AUTHORITY

School-Based Health Centers 2026 Status Update

About Oregon School-Based Health Centers (SBHCs)

SBHCs are clinics located in schools or on school grounds. They are vital community resources with a youth-centered model that supports young people's health and well-being. Oregon SBHCs provide services for medical, behavioral[1] and dental health. These easily accessible services support youth to grow, learn and thrive.

SBHCs have existed in Oregon since 1986. They succeed through public-private partnerships between:

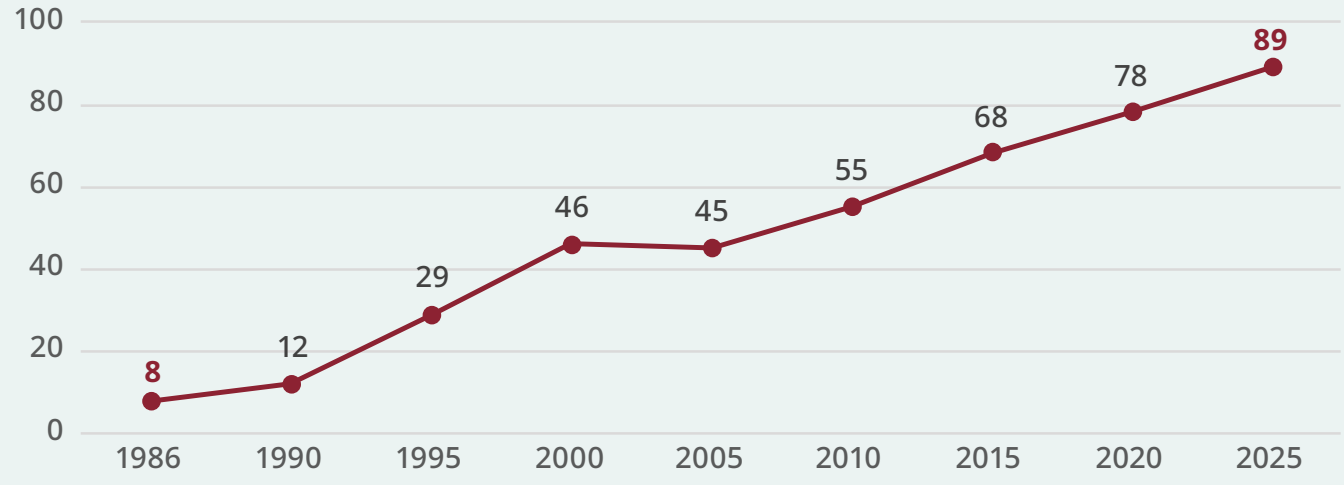
- The Oregon Health Authority – Public Health Division
- School districts and education service districts
- Local public health authorities
- Health care providers
- Parents and caregivers
- Students, and
- Community members.

SBHCs provide services in person. In some cases, they also provide services by phone or video (telehealth). By providing easy access to health care, SBHCs reduce barriers that keep students from seeking the health services they need.

Oregon SBHCs commonly provide[2]:

- Well-child exams
- Sick visit care
- Minor injury treatment
- Vision, dental and other health screenings
- Immunizations
- Substance use screening and assessment
- Mental health counseling
- Reproductive health services
- Prevention and wellness messaging
- Health-related classroom presentations

Number of SBHCs over time, 1986–2025



Source: Oregon SBHC State Program Office

[1] The term "behavioral health" represents:

- Mental health
- Integrated behavioral health
- Substance use treatment, and
- Other services designed to support mental or emotional wellness.

[2] Service provision varies by SBHC.

SBHCs in the 2024–2025 service year

Unless otherwise noted, all statistics are from Oregon SBHC encounter data[3] for the 2024–2025 service year (July 1, 2024–June 30, 2025).

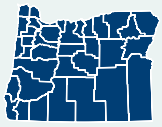
Fast Facts

89 state-certified SBHCs in 28 counties

Types of schools

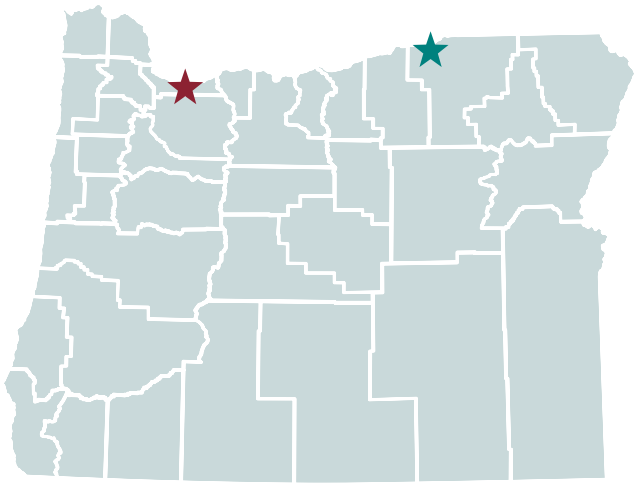
- **54** high schools
- **6** middle schools
- **12** elementary schools
- **17** combined-grade campuses

SBHCs by geographic location



- **42** Urban
- **42** Rural
- **5** Frontier

- 65% are in primary health provider shortage areas (HPSAs)
- 3% are certified rural health clinics (RHCs)
- 43% are state-recognized patient-centered primary care homes (PCPCH)
- 74% are sponsored by federally qualified health centers (FQHCs)[4]



Two new state-certified SBHCs opened during the 2024–2025 service year.

- ★ **Gresham High School, Multnomah County**
- ★ **Hermiston High School, Umatilla County**

[3] State-certified SBHCs are required to submit encounter data to the SBHC State Program Office (SPO) at least two times per year.

[4] All state-certified SBHCs are sponsored by a medical entity.

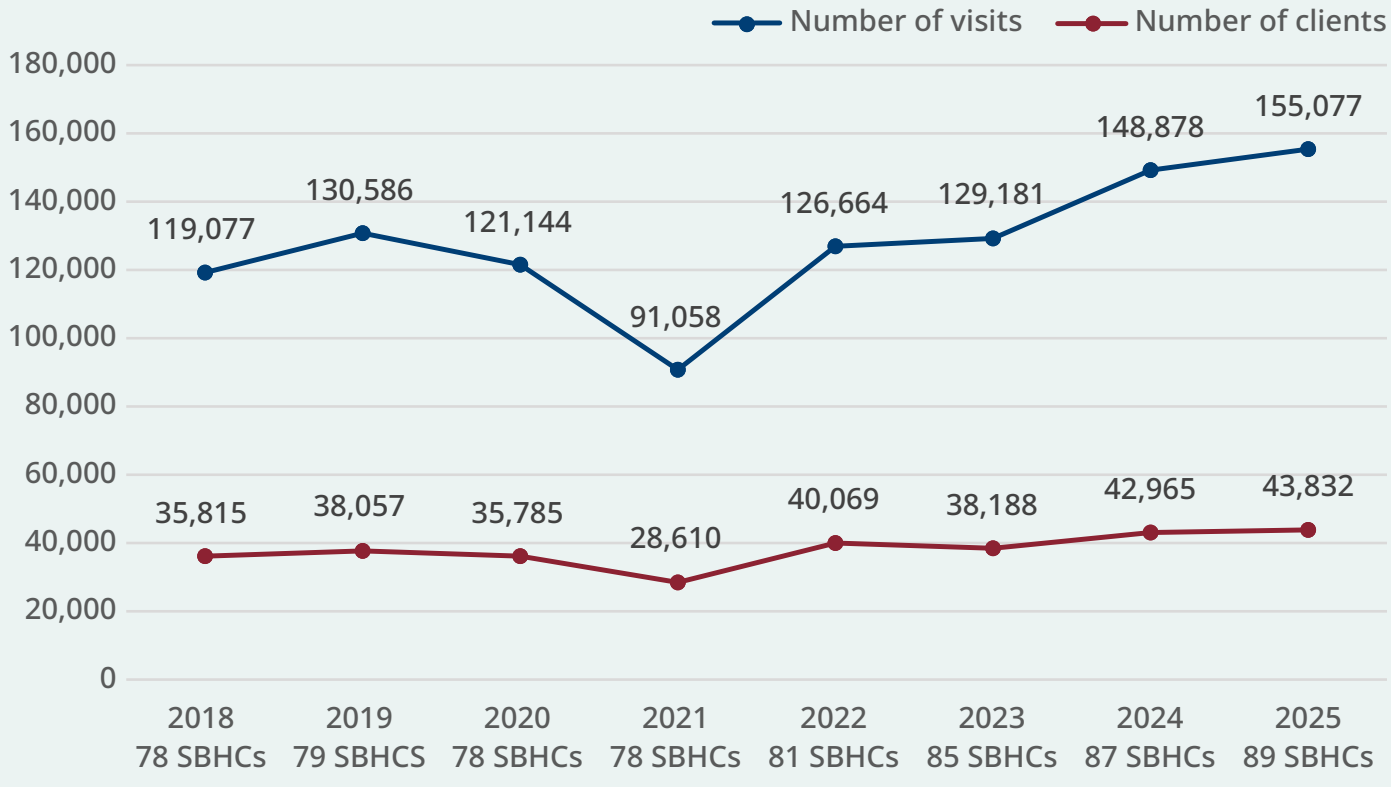
SBHCs provided 155,077 visits for 43,832 clients

76,350 school-aged youth (5–21 years) had access to an SBHC at their school[5]

98% of SBHCs had a behavioral health provider onsite

12% of SBHCs had a dental provider onsite

Number of SBHC visits and clients (all ages), 2018–2025



Source: Oregon SBHC encounter data

[5] Oregon Department of Education. Student Enrollment Report 2024–2025 [Internet]. 2025.

SBHCs support access for school-aged youth

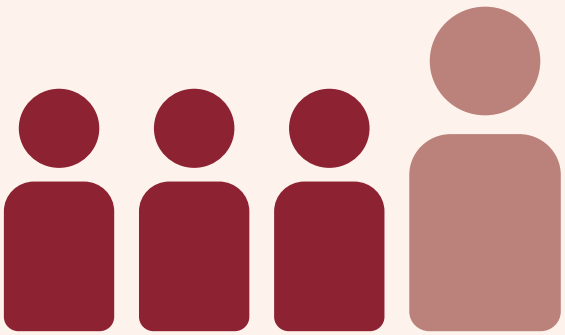
State-certified SBHCs are required, at minimum, to serve students at SBHC host schools. In the 2024–2025 service year, SBHCs provided services to **31,118 school-aged clients** (between 5 and 21 years old).

Individual SBHCs may decide to expand their services beyond students at their host school.

These SBHCs may also serve:

- Students within the district
- Siblings
- Teachers and staff
- Parents and caregivers, and
- The broader community

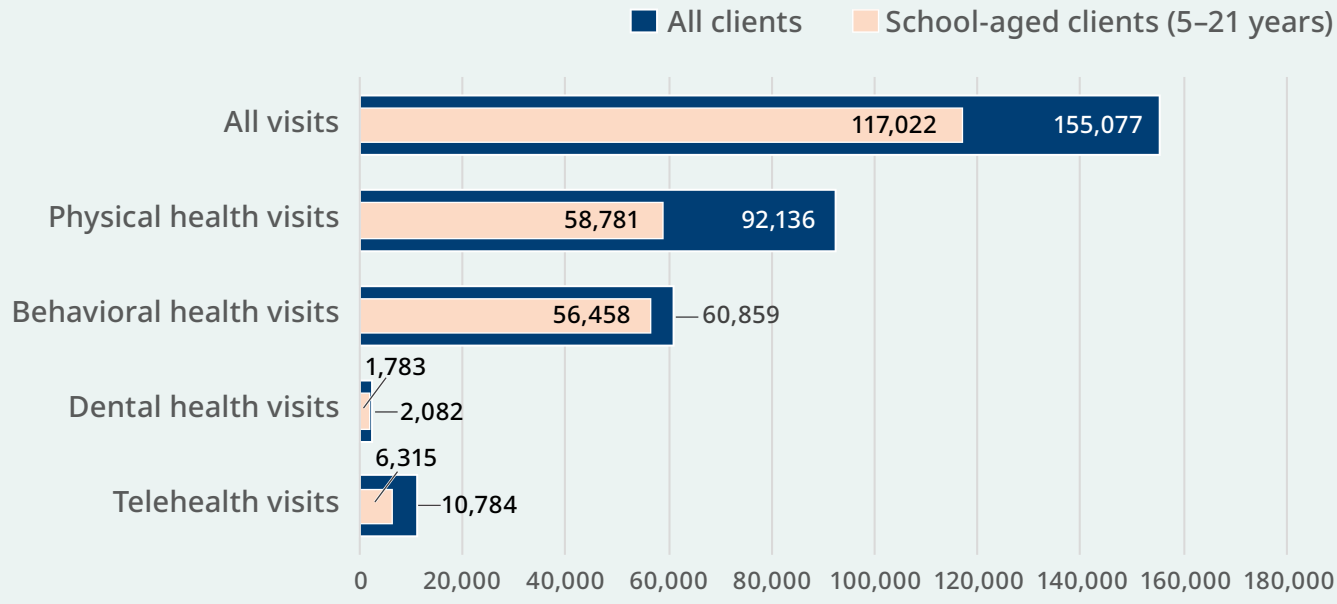
In 2024–2025, 29% of SBHC clients were outside the school-aged population.



Almost 3 out of 4 clients were between the ages of 5 and 21

- **20%** of clients were aged 5–11
- **51%** of clients were aged 12–21

Number of SBHC visits by client type, 2024–2025



Source: Oregon SBHC encounter data

SBHC State Program Office (SPO) recently began collecting data on SBHC client school enrollment. This was not a reporting requirement for state-certified SBHCs during the 2024–2025 service year, so data are incomplete. However, the enrollment data received from 65 SBHCs revealed the wide reach of SBHCs across communities:

- Clients at these **65 SBHCs** attended **592 schools,** including students from public, virtual, charter, alternative, and private schools.[6]

SBHCs services via telehealth

Telehealth is the use of electronic and telecommunication technologies to deliver health care services to clients.

Telehealth data for SBHCs includes services to clients by health care providers located outside of SBHCs.

Percent of SBHC visits via telehealth, 2020–2025

2020: **9%**	2023: **10%**
2021: **33%**	2024: **6%**
2022: **16%**	2025: **7%**

Telehealth: Physical health

73% of SBHCs delivered physical health via telehealth

6% of physical health visits were via telehealth

Telehealth: Behavioral health

79% of SBHCs delivered behavioral health via telehealth

9% of behavioral health visits were via telehealth

[6] Some SBHCs also served homeschooled students, which are not included in the 592 schools.

SBHCs help advance the Oregon Health Authority's goal of eliminating health inequities by 2030. SBHCs are a trusted source of care for many youths who belong to communities disproportionately affected by health inequities.

In 20 SBHCs, more than half of the school-aged clients were African American or Black; American Indian or Alaska Native; Asian; Hispanic or Latino, Latina, or Latinx; Native Hawaiian or other Pacific Islander; or other youth of color.

42% of SBHC school-aged clients identified as youth of color.

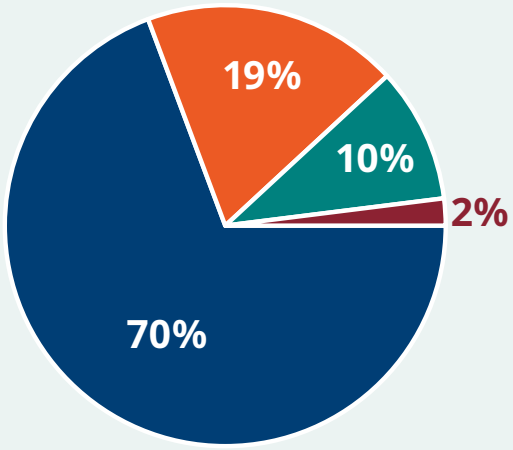
School-aged clients who received services were:

- **6% African American or Black**
- **3% American Indian or Alaska Native**
- **4% Asian**
- **28% Hispanic or Latino, Latina, or Latinx**
- **2% Native Hawaiian or other Pacific Islander**
- **60% White**
- **13% Unknown or declined race and ethnicity**

SBHC school-aged clients reported speaking **77 languages,** including:

75% English
18% Spanish
0.5% Vietnamese
0.4% Chinese
0.4% Dari
3% Other languages
3% Unknown or declined

Payment source for SBHC visits by school-aged clients, 2024–2025

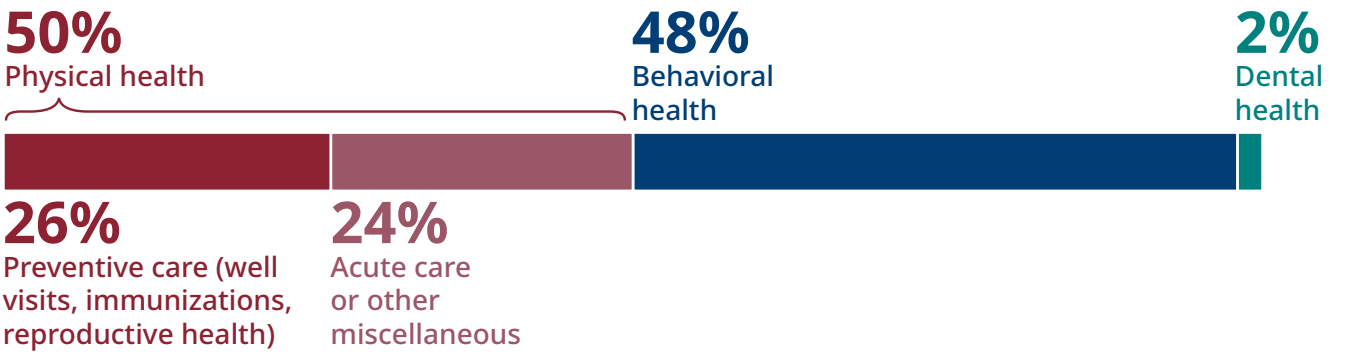


Source: Oregon SBHC encounter data

[7] "None or unknown" categories include some clients who have insurance. However, that information is not captured in the data for a few reasons:

- It is not a billable visit
- It is a confidential visit, so insurance is not billed, or
- The student does not know or give evidence of their insurance.

Reasons for SBHC visit among school-aged youth, 2024–2025



Source: Oregon SBHC encounter data

SBHC school-aged clients had 3.8 visits per year on average.

35% of school-aged clients received an immunization.

46% of school-aged clients received a well visit.

As of 2025, **76%** of SBHCs reported supplying at least one type of contraceptive on-site. Condoms and injectables were the most common forms.

All **28** counties with state-certified SBHCs included at least one SBHC dispensing contraceptives on-site.

64% of SBHCs provided long-acting reversible contraceptives (implants and intrauterine device (IUD) or intrauterine system (IUS)) on-site.

Oral health is an important part of overall health and well-being. SBHCs can serve as oral health care access points for school-aged youth.

12% of SBHCs had a dental provider onsite.

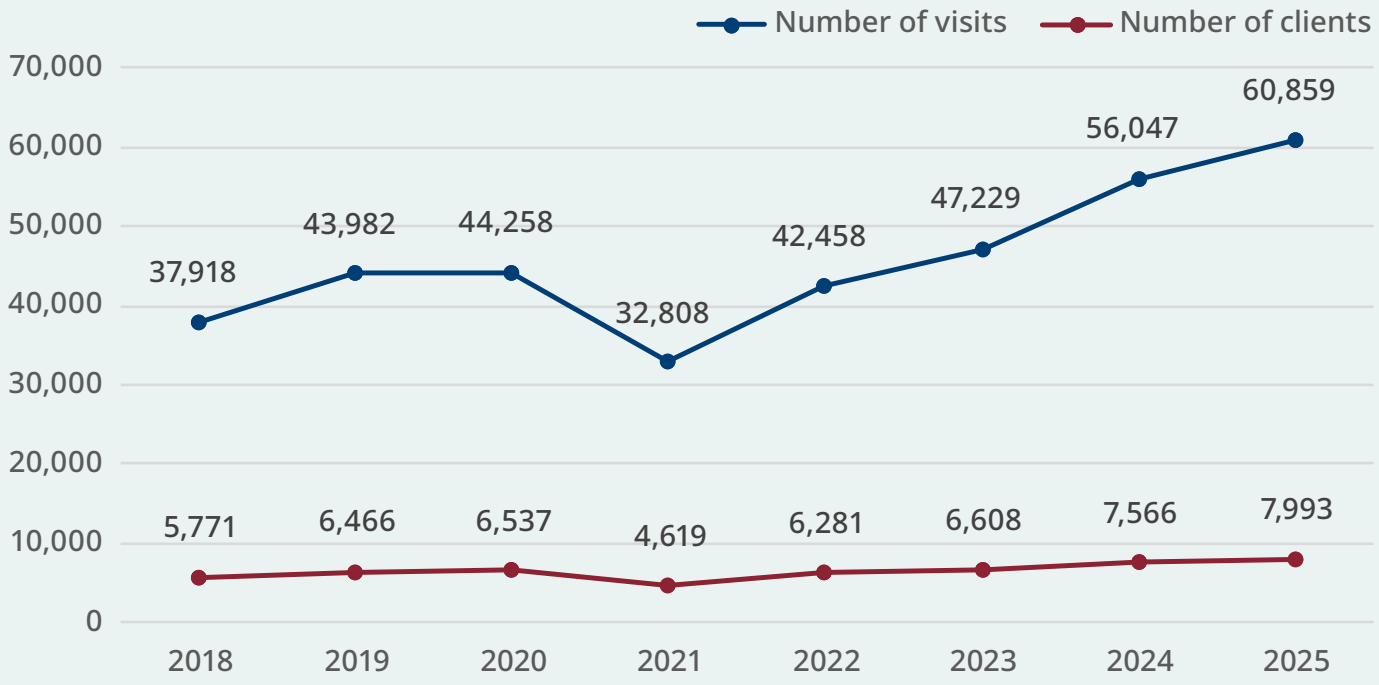
1,783 dental visits were provided to **938 school-aged clients.**

Oregon SBHCs support the integration of behavioral health care and physical health care. This provides youth the option to access collaborative care all in one place.

SBHCs provided 56,458 behavioral health visits to school-aged clients.

- **6,989** school-aged clients had a behavioral health visit.
- School-aged clients who saw an SBHC behavioral health provider had **8.1 visits** per year on average.
- **57%** of school-aged clients who saw a behavioral health provider also had a physical health visit at the SBHC.
- **29%** of school-aged clients who saw a behavioral health provider also had a well visit at the SBHC.

Number of SBHC behavioral health visits and clients (all ages), 2018–2025



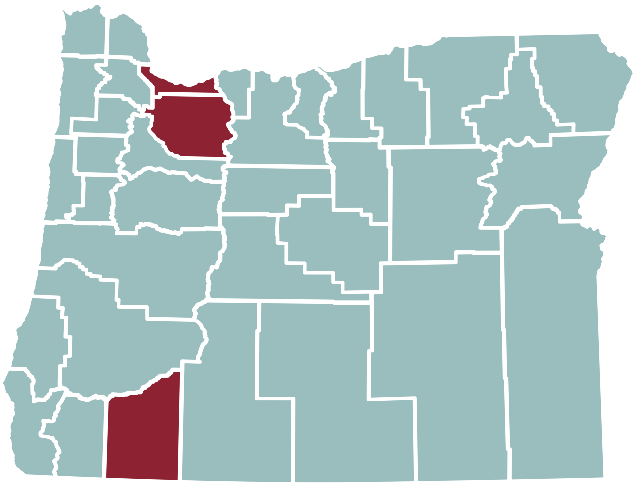
Source: Oregon SBHC encounter data

SBHC School-Linked Telehealth Pilot Program

In 2021, the Oregon Legislature passed House Bill 2591, providing funds for three SBHC medical sponsors to pilot school-linked telehealth programs. Grant funds were awarded to **La Clinica** (Jackson County), **Multnomah County Health Department** (Multnomah County) and **Orchid Health** (Clackamas County). The pilot operated from spring 2022 through June 2025, providing almost 300 physical or behavioral health visits to students across 11 schools.

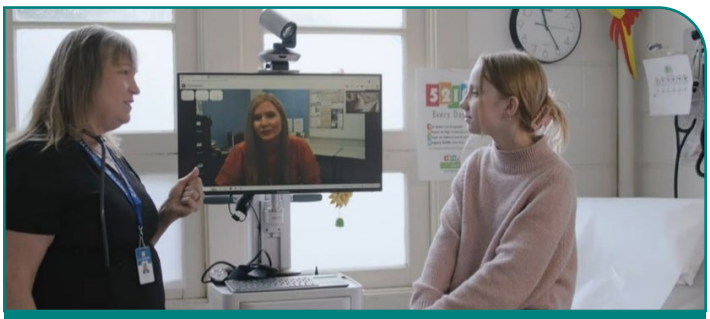
The goals of the School-Linked Telehealth Pilot Program were to:

- Expand student access to physical and behavioral health care,
- Improve student health and education outcomes, and
- Test the viability and sustainability of telehealth models in school settings.



Grantees were asked to implement a "hub-and-spoke" model of telehealth, with the SBHC acting as the hub and local schools without SBHCs acting as the spokes. By using hospital-grade rolling telehealth workstations, SBHC clinicians could conduct full primary care medical visits, including taking vitals, listening to heart and lungs, and examining the skin, eyes, ears and throat.

Each of the pilot program grantees experienced setbacks before they were ready to provide services. Many schools, especially those in rural areas, were not equipped with secure broadband internet—a must-have for effective telehealth. Other challenges related to staffing issues in the schools, navigating HIPAA and FERPA compliance and developing simple workflows for patient registration and parental consent.



La Clinica's telehealth workstation is affectionately called "Dr. Wheels."

Despite the obstacles, two of the three grantees successfully launched their telehealth programs in 2023 and continued through the 2024–2025 service year. La Clinica and Multnomah County Health Department effectively expanded the reach of their respective SBHCs by caring for students with chronic healthcare needs, treating acute illnesses and injuries, and connecting new arrivals to a medical home. To learn more about the School-Linked Telehealth Pilot Program, read the full report online at Oregon.gov/OHA.

> *[Telehealth] creates a way for parents to pay attention to their kids' needs without leaving work or jeopardizing their job... This is a model worth trying to figure out the bugs, especially for families who don't have other options.*
>

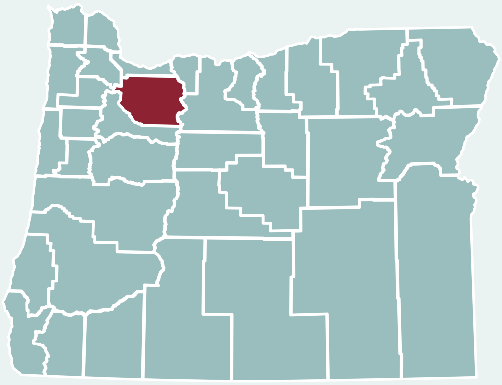
SBHC highlight



Outside In expands student leadership opportunities and cultural responsiveness at Milwaukie High School.

Clackamas County: Milwaukie High School Health and Wellness Center

As the sponsor at Milwaukie High School's (MHS) Health and Wellness Center, Outside In has coordinated a Youth Advisory Council (YAC) since 2010. The MHS YAC has become an invaluable space for students to socialize, share ideas, and engage in fun activities that promote public health awareness and SBHC access.

During the 2024-2025 service year, the MHS Health and Wellness Center sought to increase student participation and leadership in ways that directly influenced SBHC policies, procedures, and community. Two new youth-led groups arose from these efforts: the Patient Advisory Board (PAB) and Sana Sana.

What is it?

Patient Advisory Board is a group of students who provide feedback and develop policy to improve the Health and Wellness Center.

Why would I join?

Directly impact how the clinic that serves you operates while gaining valuable experience for a career in healthcare, advocacy, and more.

Who can join?

Any MHS or MAA student who has received services from the Milwaukie Health and Wellness Center in the last 12 months.

PAB recruitment materials used art by a former student and youth-friendly language.

Patient Advisory Board (PAB)

Comprising five students in 2024–2025, the MHS Health and Wellness Center PAB approves policies, discusses areas for improvement, and implements changes in the SBHC. Any major changes to the SBHC that could impact patient experience must now be reviewed by the PAB. The PAB meets twice a month throughout the year, including over the summer (per board members' request).

During their inaugural year, the PAB worked on several projects:

- PAB supported the SBHC in changing from a manual text message appointment system to an automated one. PAB members reviewed information on the proposed messaging service, the existing clinic workflow, rationale on why the clinic was considering this change, and a mock workflow for the future use case. Group discussions informed the content of appointment messages, when messages are sent, and a process to gauge success.
- To enhance outreach services, PAB members conducted an in-depth revision of "Navigating the Healthcare System," a presentation provided to MHS seniors on accessing health services after high school. The revised presentation has a more direct and student-prioritized organization, uses fewer acronyms and includes an anonymous questions box. There was a noticeable increase in student engagement with the revised presentation materials and structure.
- In reviewing the food pantry procedures, PAB members suggested and implemented a new schedule that increased student food pantry visits without increasing the staff capacity requirements.
- When the MHS Health and Wellness Center was considering workflow changes to improve integration between medical and behavioral health services, PAB members reviewed and recommended language that would make sense to students.

> *I have not seen an opportunity like this for people my age. I am excited to make the health center even better on PAB.*
>
> – PAB board member

> *[The PAB has] many benefits for both the SBHC and for board members, including furthering the future careers of board members, learning more about FQHCs and improving the clinic they utilize for both them and their peers.*
>
> – MHS Health and Wellness Center Youth Engagement Coordinator

By incorporating the PAB into SBHC operations, the MHS Health and Wellness Center can better understand the population they serve, improve patient-centered care and increase patient engagement. PAB-driven changes to the SBHC become tangible proof that the clinic values student opinion and advocacy.

Board members felt that the Patient Advisory Board supported their own understanding of clinical services, and they were excited to have the opportunity to directly influence the care they receive. When board members visit the SBHC, their impact is evident in the text they receive, the language they hear at the front desk, and the signage on the walls.

Sana Sana

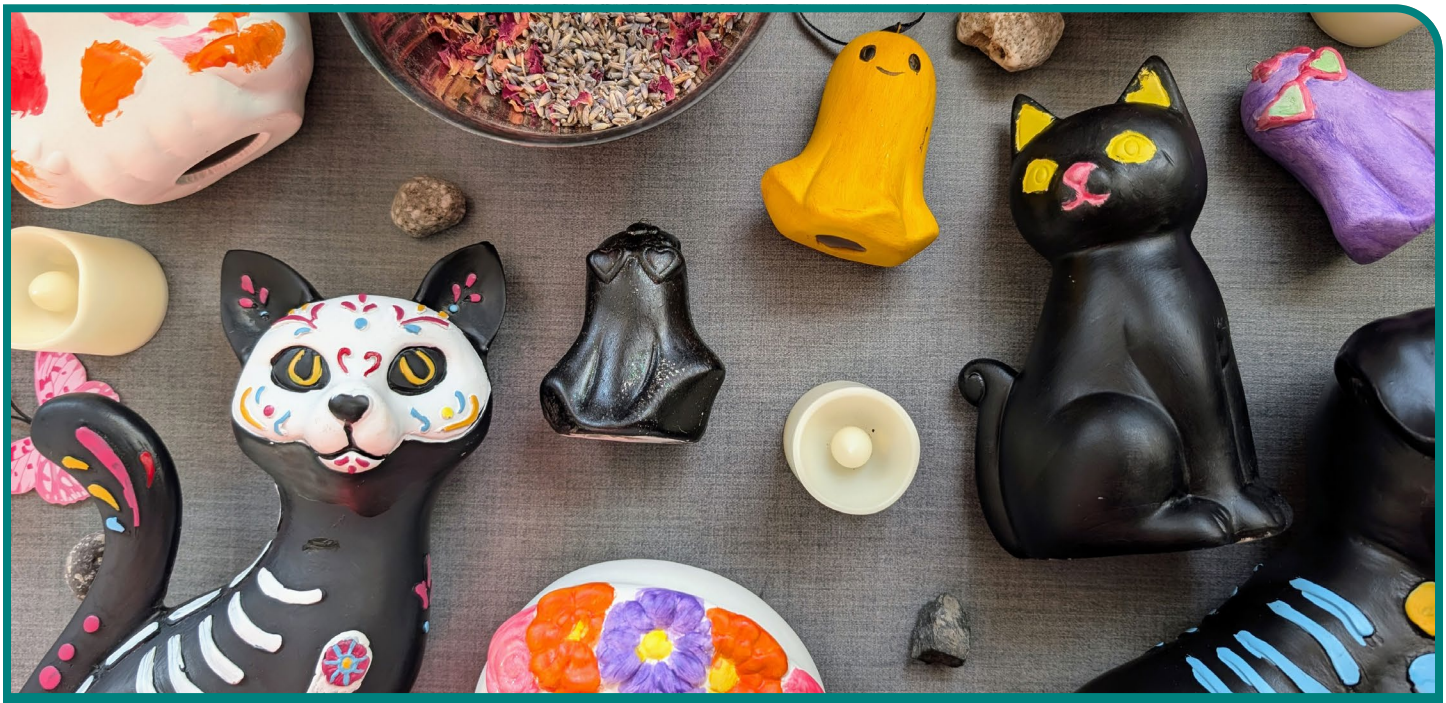
When the PAB initially took shape, there were two distinct but overlapping boards—one with meetings in Spanish hosted by the Bilingual Resource Navigator and one with meetings in English hosted by the Youth Engagement Coordinator. These meetings had similar agendas with notes translated and shared across the two boards.

The name "Sana Sana" draws inspiration from the beloved childhood rhyme, "Sana sana colita de rana," a phrase known across Latine cultures that symbolizes comfort, healing, and cultural continuity.

As meetings progressed, Spanish-speaking board members expressed less interest in SBHC policy changes and more desire to support community and address specific health topics. As a result, the Spanish Patient Advisory Board transitioned to form Sana Sana, a youth-led space to explore healing in community, especially in response to the national climate where Latine and immigrant students and their families continue to face discrimination, othering, and constant threats of detainment and family separation.

During the 2024-25 school year, Sana Sana members spent time exploring the highest priority health concerns within the MHS Latine community, along with building internal connections and trust within the group. This trust was then integrated with shared cultural experiences to create a space for Latine students to connect with their community. Members consistently engaged in activities, showed up throughout the school year and requested more time to meet over the summer.

Moving forward, Sana Sana will be a space for traditional practices, shared meals, movement, storytelling, and creative expression. Participants plan to explore nutrition and body image through culturally relevant recipes, develop presentations on bullying prevention, craft protection charm bracelets and use traditional medicinal herbs from the SBHC's community garden to connect with ancestral healing practices.



Sana Sana members painted cats and skulls for their ofrenda, an altar to honor deceased loved ones.
