Procedure

Strong accountable business processes are the activities conducted in the course of the agency's operations that are expected to add value to our clients, employees and stakeholders and to the services the agency provides. Effectively monitoring financial transactions helps to strengthen regulatory compliance and increases the chances of detecting error, fraud, waste, abuse or preventing an improper activity before the agency's ability to achieve its operational objectives are materially affected.

This procedure emphasizes accountability and responsibility when delegating and receiving expenditure authority. Delegated expenditure authority is an important internal control designed to protect public resources.

Applicability

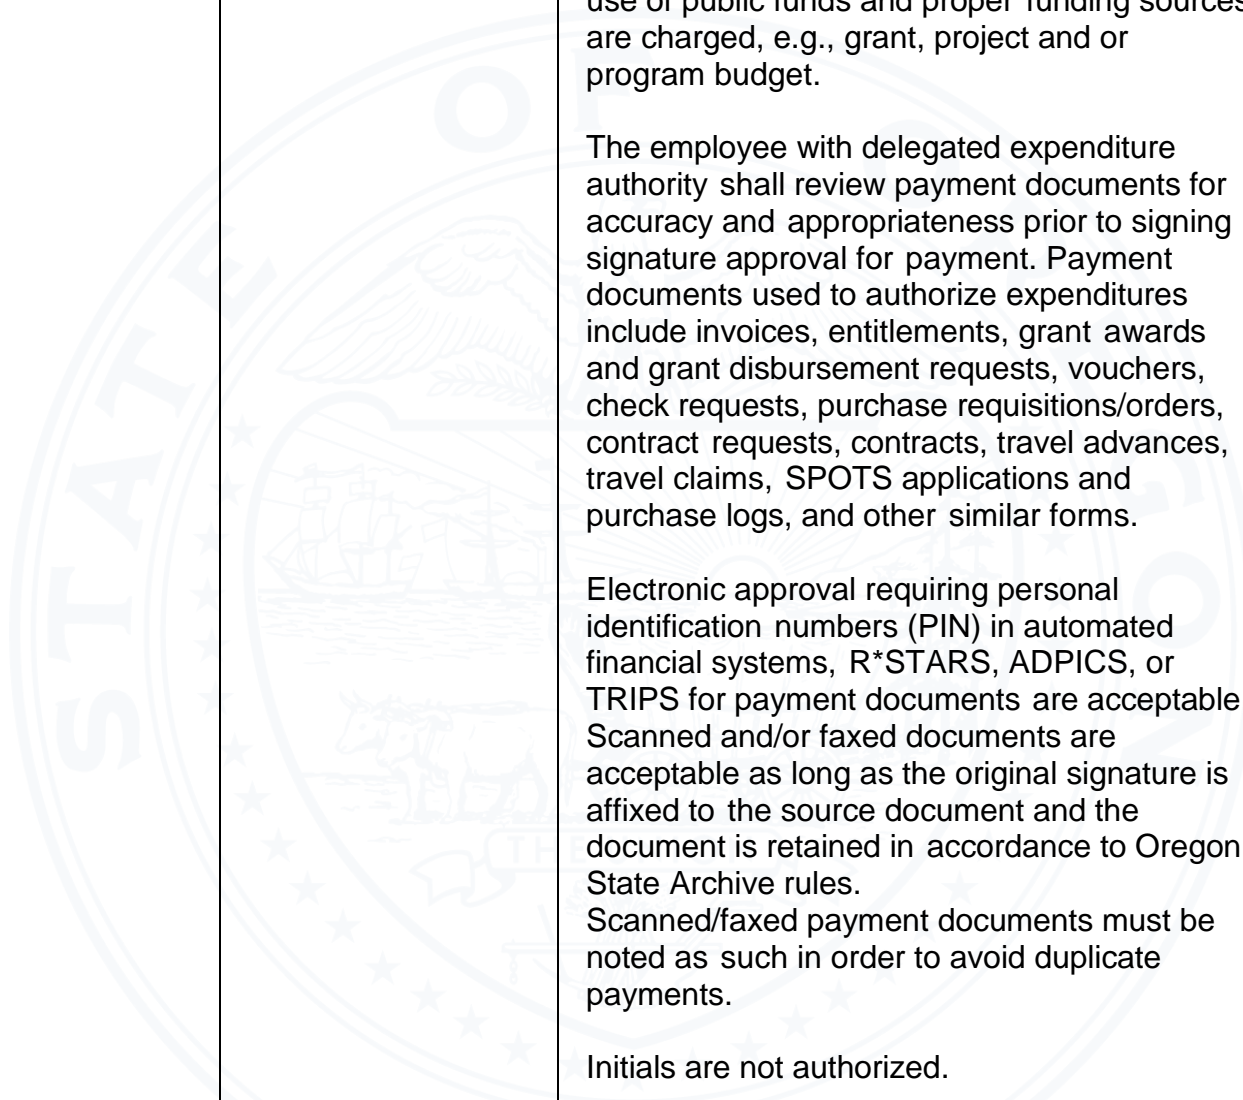

The agency must ensure that actual financial operations comply with applicable statutes, administrative rules, and legislative appropriation acts. The Department of Administrative Services (DAS) State Controller's Division established specific policies and procedures for accounting regulations, safeguarding assets and disbursing public funds which are binding upon the Department of Human Services and Oregon Health Authority.

This procedure is applicable to all employees. Failure to adhere to this procedure may result in disciplinary action, up to and including dismissal.
